

Hixon
884040

[see: MI 936015]

- Aug. 21/00
Chat with Dave Javorsky
- he has mineral claims over placer cls. ^{owned +} being operated
by Mr. Musselwhite (lives in Hixon)
- distinct reddish 'layer' sitting on pay (Au) gravels
which, in turn, sit on altered (quartz + clays [white])
schists (at contact with 'greenstones' → i.e. Archean analog)
- placer gold is angular (some rounding) i.e. pretty 'local'.

surface

redish water
redish soil
cal rock

a Hebble (grtz + clays)
white schist
