

TOTAL AREA OF EXPOSED SOIL
500 m²
SEEDED WITH PRINCE RUPERT
FOREST MIXTURE AT CONCLUSION
OF PROGRAM.

1984 CUTS
9000 m²
TREES LIMED AND CUT,
TRAILS SEEDED.

TABLE OF UNITS	
AGE AND FORMATION	LITHOLOGY
Tertiary	Veins of quartz, gold and silver-bearing pyrite±chalcopyrite
Cretaceous	Leucocratic dykes
Coast Plutonic Complex	Pegmatite
Palaeozoic-Jurassic	Biotite gneiss
Regional faulting	
Multi-phase deformation, metamorphism, igneous intrusion	

LEGEND		
Cleavage	1st: Inclined	Vertical
Altitude of vein	2nd: Vertical	
Fault		
Soll grid		
Topographic contour (metres)	320	
Limit of outcrop		
Trench	HRST6	
Claim post		BM2 O
Bench mark		TP6 *
Turning point		
Surface runoff		

NOTES: For plan view of River Vein workings and cross-section A-B see Figure 9
For long-section C-D see Figure 10
