NADA

Hot rk. - foliated ^{biotite} gneiss with
dykelets of pegmatite (qtz diorite)

- some large qtz xls
- very weak (< 1 ft) alt'd secs
- sericite - qtz - px
- All holes were short + didn't
appear to intersect any sig. min.
- Dump is overgrown + may
consist of 50 tons - no good
ore samples seen (only px)
- Camp in meadow (clearing)
south of drilling
- Large trees (cedar) had to be
cut for drill sites

POTENTIAL? - doesn't look good!
