

① ABITIBI-SEDEX VISIT Oct. 8/97

- Peter Klewchuck (ex-Cominco) Woodfill Sun/cloud +8°C
- Mahon Mtn. area (ex-Chevron)
- (Yahk-aka project) [with AGS]

Irishan Cr. Lewis Cr. 'vents'

Use of gravity Surveys (~100/stn)

→ 'Boomerang Anomaly' (200-m spacing)

- airborne mag. N-S structures - Flown on E-W lines (cost of survey ~ \$/km)
- 2500' drill holes - on both props. (#0.5k + #0.5k)

using "bar code" matching of Middle Aldridge (a la Cominco) (esp. Sundown marker)

- identified several new vents - esp. in Irishman Cr. + Lewis Cr. + Moyle areas

- see Oct. 8/97 PRESS RELEASE 97-3: 2.55m @ 9.65% Zn + 5.82% Ag + 49.4 g/t Au

\* Sept. 20/99 Steve Coombes (Kennebec) still likes the potential here. No marker horizons

Irishman Cr. 884266

② Optioned LEW prop. from Comms  
- 1 ddh in '97
