

IRON RANGE

Wed. July 25/01
Sunny
+25°C

- with Chuck Downie (Eagle Pk.)
+ David Terry (via ATV (2))

~ 1 1/4 hr up to Main zone (~ 1 hr down)

- from Arrow, Ck. (Dentistry rd. (~ 18 km E of Creston))

- 15-km soil (N-S) survey

MAIN ZONE of N-S base-line. ~ 650 m E + W

- numerous 'large' trenches - partially filled in. Prev. drilling - only shallow (~ 20 m)

[MI-0825E014-020]

60-150 m wide; > 3 km long

lens of massive hematite + lesser magnetite (0.5 to 3 m wide)

[MI 825E-018]

- best exposed on Maple leaf claim.

(4 parallel lenses spaced 5-40 m apart)

- massive lenses surrounded by hematite breccia with angular frags. of albite (white). [sodic alt'n]

- some good outcrop exposures (knobs) of massive hem. Also good old 'blasted' pits in massive hem.

- new logging roads up Crackerjack Cr (~ 0.5 mile from ridge top)
