

JAVA

July 25/96

Sunny + 28°C

- + Bob Fung
- + Visi, + Dave Fleming
(Kennecott) at Te talcuz LK. (cabin)
- He really likes this new (1995)
large, hydrothermal porphyry-related
prospect.
- Qtz (stkwk) veins with MoS_2
+ py + minor cpx + arsenopyrite
- also potential for auriferous gold
veins.
- 1.5 hr. hike (less via trail bike)
- west of CH property

[DF feels Kennecott may not
'stick' with property - i.e. expand
downsizing; need for 'world class'
projects]

[Tom Heath terminated in Ven. office]
