

# KECHIKA

(Watson-Liard)

Dec. 16/97

- office visit (Schroeter + Pilsent) to Fizard Expl<sup>s</sup>  
(Shamus Young + Egil Liugard)
- area originally flow - airborne mag  
+ ch. staked on basis of airborne anomalies
- follow up lake sediment geochem
  - unfortunately, couldn't always duplicate  
OSB (Cook's) results.
- main target = Zn - but turned up  
polymetallic anomalies (Zn, Cu, Au etc.)
- main claim block = "B" block near Musela  
Ck. at extreme NW corner of new Muskwa  
Kechika RMZ (row of Airplane Lk.)
  - incl. intrusive rk. just to W. of main  
showing/grid (small rk.)
- Gordon Capital (Philip ?) from Toronto  
is the main/only financier.
- Deposit Target Type - setex with a  
polymetallic intrusive overprint.
