NEWS RELEASE

Waldo W. Ejtel, President of International Coast Minerals Corporation, wishes to announce that a drilling program is underway on the Bear Property in the Kennedy River Gold Camp of Vancouver Island, located 55 km. west of Port Alberni, B.C., Canada.

Current drilling on the Black Vein indicates the presence of significant gold values over mineable widths. Peak values in the vein system have graded as high as 3.692 oz/ton. The highest gold values recovered to-date were obtained from the cores of three diamond drill holes as follows:

- 1) An intersection in drill hole BR-88-6 graded 0.936 oz/ton across 2.17 m.
- 2) An intersection in drill hole BR-88-7 graded 0.313 oz/ton across 1.84 m.
- 3) An intersection in drill hole BR-88-8 graded 0.321 oz/ton across 1.87 m.

A significant new zone of quartz sulphide veinlets with gold values was discovered during the current drilling program, which indicates the potential for larger tonnage through underground mining, or the eventual possibility for open-pit.

The Company feels that these results, early in the drilling program, are just the beginning in determining the extent of this discovery.

Waldo W. Ejtel, President

NEWS RELEASE

Negotiations are underway between Directors of Nationwide Gold Mines Corporation and International Coast Minerals Corporation with respect to the amalgamation of the two companies. Nationwide Gold Mines Corporation has extensive holdings next to International Coast Minerals' properties in the Kennedy River Gold Camp on Vancouver Island.

Significant gold values were encountered on adjoining properties both in diamond drilling and trenching which have recently been completed by Nationwide Gold Mines and Golden Spinnaker Minerals Corporations. The diamond drilling was carried out on the Blaster Property which is held 50% by Nationwide Gold Mines Corporation and 50% by Golden Spinnaker Minerals Corporation.

Negotiations are also underway with respect to International Coast Minerals Corp. taking over 50% interest in the Blaster Property held by Golden Spinnaker Minerals Corp.

Should negotiations be successful it will dramatically increase International Coast Minerals' holdings of prime property in the Kennedy River Gold Camp.

Further information is available on request.
