Minerals North - CIM Meeting (May 22-24) - Excellent meeting (159 registrants); participate in Kemess trip (about 25). Congrats to all PG office (Beswick, Lane, Wood, Morgan, Parry, Rivers, hope I didn't miss anyone) for a job well done! PW presentation on exploration. Four requests for copy of NW poster including two MLA's. Meeting highlights include

- strong political presence (1 MP, 3 MLA's, several mayors)
- three Aboriginal presentations in the *Mineral Land* session, in particular strong support for the Omineca-Stewart connector road by Earl Muldoe (aka Delgamuukw)
- Jason Weber (Rimfire) on the high quality/value of Ministry geologic databases to evaluate B.C.'s high mineral potential, and low budget relative to other mineral-rich provinces
- Tony Andrew (PDAC) on public image of the mining industry - "its what we do, not what we say" that leads to public trust, and to focus on special publics, not the general public
- Mike McPhie (ex-Knight Piesold, now NRCCanada) on sustainability as applied to the mining industry
- Mayors of Quesnel, Prince George, Chetwynd, Tumbler Ridge, Fort St James and Stewart spoke on the role and positive impact of mining in their respective communities, and volunteered their active support for projects
- attendance throughout all sessions by 3 Kaska, whose attendance is funded by the Interim Measures agreement (under Treaty negotiation office)

Treaty of
Bonsai
Kaska FN - Participated in meeting between Ministry and Kaska reps (May 21) regarding activities under the Interim Measures agreement. Event organized by Shelley Guthrie.

Heritage Resources will merge with Glenfred Holdings Inc. thereby consolidating 2202 claim units (47,239 hectares) in the Eskay mine area, extending from the Iskut River to Treaty Creek. Glenfred is a private company owned by Glenn Laing and Fred Christiansen through St Andrew Goldfields Ltd (50%), Zebrex Holdings Inc (37.5%) and Dolly Varden Resources Inc (12.5%). St Andrew will hold 45% of Heritage and appears to be the controlling player. A report to be filed on SEDAR details claims staked, purchased and option agreements. At Treaty Creek and Bonsai, a minimum of \$100,000 is to be spent on each property. Glenn Laing and Fred Billingsley (of Heritage) state that \$2 million will be expended on the merged companies' claims this year, in a variety of early-stage and drilling programs. The work is driven by high-computer-tech geological modeling of the Eskay area by Fractal Graphics (of Red Lake, Goldcorp Challenge fame), contracted by St Andrew Goldfields. Peter Lewis has provided geologic control to rationalize umpteen geologic legends, derived from MDRU studies, circa 250 digitized AR's and other? geodata that have gone into the computer hopper. The results of this work, said to reveal new insight into Iskut geology and mineralization, will be unveiled by Nick Archibald (of Fractal Graphics) in Vancouver on June 10. Richard

Kinaskan (104G 033, 160, 161, 166, 167)- Consolidated Earth Stewards Inc. will acquire the QC claims (ca 538 units) staked recently by Viceroy (see April 5 report). The claims cover satellite intrusions north of the early Jurassic Groat stock, emplaced into Stuhini and Hazelton Group strata. Mineral potential includes both copper-gold porphyry similar to Red Chris and Eskay-style VMS associated with Jurassic felsic volcanics and felsite intrusions.

Tommy Jack (94D 031) - Gold City Industries Ltd. has optioned part of this intrusion-related/ vein gold prospect from Al Raven (Prospector Assistance grant in 2000) located 150 km north of Smithers. Competitor / prospector Lorne Warren assures me the best targets and past Noranda drill holes are on his adjoining claims. Rumoured exploration budget of \$300K. Property is very close to the proposed Omineca-Stewart connector road.

Copper Canyon (104G 017) - Eagle Plains Resources have optioned 36 claim units covering part of this copper-gold porphyry deposit from Whitehorse prospector, Bernie Kreft (see PW report Sept 28, 2001). Silver Standard still holds some claims. Located 10 km east of Galore Creek, which is being considered by First Quantum Minerals.

Prince Rupert - Smithers Geo-field trip (May 30-June 1) - Participate in trip led by Tom Richards and Glenn

Subject: Northwest Geology Oct 31 2003

Correction to last report- Mary-Ann Poirier is Executive Director of the Old Fort band office, not Chief of Fort Babine band.

Thorn - Cangold and Rimfire announced a significant drill intersection from the Oban breccia zone from their 8 hole (875 m) program- 1.97 g/t gold, 190 g/t silver, 1.3% lead and 0.77% zinc across 14 meters. Thorn is located 125 km south of Atlin.

Foremore - Roca Mines reported assay intercepts from drill holes at the SG and BRT zones 50 km NNW of Eskay Creek. At BRT, 15.9 meters of banded semi-massive to massive pyrite was intersected in the best of 7 holes drilled below the surface showing of laminated pyrite-sphalerite-galena. A 2.3 meter interval graded 7.9 g/t gold, 22.6 g/t silver, <0.1% copper, 0.1% zinc. The good news is drilling revealed the zone is associated with a 40 meter thick pyritic felsic tuff unit, a horizon worthy of follow-up. Results at SG were mixed, 4 drill holes returned lower grade intercepts than surface channel cut samples-

- 2.0% Zn, 0.6% Pb, 10 g/t Ag, 0.13 g/t Au over 3.46 m (channel)
- 6.7% Zn, 2.3% Pb, 43 g/t Ag, 0.11 g/t Au over 1.82 m (channel)
- 3.5% Zn, 2.0% Pb, 30 g/t Ag, 0.17 g/t Au over 1.62 m (channel)
- 1.6% Zn, 0.9% Pb, 8 g/t Ag over 1.0 m (drill hole 1)
- 2.0% Zn, 0.4% Pb, 6 g/t Ag over 1.1 m (drill hole 2)

Difficulty in taking a representative surface sample of the gently dipping mineralized horizon is a possible explanation of the discrepancy in results.

Taurus - Navasota Resources drilled 13 holes (1950 m) on this bulk tonnage gold prospect near Cassiar.

Louise Lake (93L 079) - This copper-gold porphyry prospect 30 km west of Smithers was staked by Bernie Kreft when previous claims lapsed. The prospect has an estimated geological resource of 50 million tonnes of 0.3% Cu, 0.3 g/t Au.

Bob Creek - International Curator have deferred drilling to next year because the database for the property is incomplete. Two(2) key Royalstar 1990 drill holes were not filed for assessment. Bob Creek is located south of Houston.

Homestake Ridge - Bravo Venture Group plan a more extensive drill program in 2004 on this property 30 km south of Stewart. The company is encouraged by a drill intercept of 9.8 g/t gold over 3 metres in a quartz-pyrite stockwork and breccia at the contact of the Goldslide intrusion.

GJ (Kinaskan) - Airborne EM-mag survey completed in late October. Drill program anticipated in 2004. *Royal County Minerals + Int'l Curator Res. Ltd.* *f. QC*

Red Chris - bcMetals Corp. will begin a detailed feasibility study in January 2004, based on data collected during its \$4.3 million, 4-drill, field program, scheduled to conclude about Nov 10. Preliminary contact has been made by the company with the EA office, to re-enter the approval process.

Galore - SpectrumGold issued a press release on initial drilling results, featuring a spectacular intercept of 1.52 g/t gold and 1.16% copper over 164.4 meters in the core of the deposit. Hatch Engineering will complete an economic assessment and resource estimation by mid-2004.

Good morning!

Rick Bailes asked me to send you a summary and presentation on International Curator. If you have any questions or require further information, please do not hesitate to call.

Best regards,

Sophia Shane
