CONFIDENTIAL

Dear Mike:

**Re: POTENTIAL AREA FOR HYPERSPECTRAL SURVEYING**

As discussed briefly over the telephone earlier this week, I enclose some material on the area SSE of Johanson Lake ("Kliyul Creek"), as an 'area of interest' (i.e. I've long been interested in) as a potential target for both large tonnage, low grade Cu-Au and, bonanza-grade (i.e. sweetener) Au deposits. If you are interested in discussing further, I suggest we meet to discuss appropriately. I 'grabbed' the enclosed info from my files in a hurry; I have much more material.

Good luck in your hyperspectral surveying in the Tooodoggone - should provide some interesting/great targets.

Yours sincerely,

Tom G. Schroeter, P.Eng./P.Geo.  
Senior Regional Geologist

Enclosures: 1) General info  
2) Kliyul  
3) Soup  
4) Mariposite
