**Subject:** Seneca VMS - Potential?

Gentlemen, I may have mentioned that this interesting/potentially significant VMS deposit in the Harrison Lake area is 'AVAILABLE' for option. I have had some recent enquiries about the Krof VMS. I'm thinking that a 'regional' interest/'play' for VMS targets could develop or be promoted; albeit that Seneca is a Kuroko-type and Krof is suggested as a Besshi-type. Regardless, thier spatial proximity is worth 'capitalizing' on? The Seneca property is currently owned by an 'old lady'; a retired lawyer (John Petrunia) is handling her affairs, incl. being the custodian of the extensive data package). International Curator (Rick Bailes et al.) , who returned the property to the owner, still 'believe' stronly in the property's potential that they would like to see further work done. However, there is some 'pressure' (from the gov't?) to dismantle the GREAT core shack facility, as well as the core. Rick and myself would hate to see this happen, so 'we' are actively trying to find a 'suitor'. Any interest/ideas? Gerry, I will give you a copy of a CIM paper on Seneca ( 1996) at lunch tomorrow. Tom.

John

Many thanks for the info - will review the data at first opportunity and get back to you in order to arrange a visit if we feel it fits our criteria. Please forward the independent summary when available

Regards  
David

**Subject:** Krof (North Fork) Property - VMS

David,

I am enclosing some information on the Krof VMS property (formerly North Fork property) that I own 50/50 with Gerry Carlson (KGE Management Ltd.). We recently staked 20 Units over the prospect with the discovery showing at the center. Access is via logging roads on the North Fork of Cogburn Creek, very near the Bear Landing log sorting grounds on the east shore of Harrison Lake, BC. The Krof property is available for option.

Minnova conducted two drill programs on the Krof (1988 & 1989), under the direction of Colin Burge.

Attached is the Krof Minfile write-up and some site photographs taken this past Thursday.

An independent Summary Review Report on Krof is being prepared by David Makepeace, PEng. The report will be available within a week.

The GSB is presently active in the Cogburn Creek area doing a regional mapping program in the ultramafics (Robert Pinsent and Chris Ash). The "Cogburn" ultramafic property that Gerry and I also own, is located 8 kilometers south of the Krof and is under option to Leader Mining International Inc.

If you have any questions regarding Krof do not hesitate to contact me 604.536.8356 or Gerry Carlson (604.688.0833) or Tom Schroeter (604.660.2812).

Regards, John  
(604.536.8356)

PS. The Krof VMS property is in the same general area as the Seneca VMS property (call Tom Schroeter for details), so combined they may make an efficient and potentially rewarding exploration program.

→ KROF

**Subject:** Notice of Work - Krof Property (Tenure 507487)

Good Morning Mr. Webster,

We have the opportunity, on very short notice, to piggy-back on Teuton's airborne survey at Harrison Lake being done in about 6 days time by Aeroquest International. The attached and the following information I trust will satisfy as a "Notice of Work".

Sincerely,  
John Chapman, PEng.

**Subject:** Proposed Krof Airborne Geophysical Survey, Harrison Lake, BC, Canada

Good Afternoon Gary,

2006-06-21

Attached is a proposed plan for the 28.5km airborne geophysical survey of the Krof property. I have included some general information on the Krof property and on the 50/50 owners, John A. Chapman, and KGE Management Ltd. (Gerald Carlson).

Please give me a call to confirm your pricing (including mobilization and standby) so that we may complete a contract for signing ASAP. I am keeping Dino informed on this and also Chris Gulka of North Pacific Alloys Limited so they are aware of any cost sharing opportunities with Aeroquest International for these piggy-back surveys.

Gerry Carlson is located downtown and he could sign the agreement on the Krof, once we have finalized the terms. Gerry may be reached on his cell at 604.816.3012.

Best regards,  
John Chapman  
604.536.8356

PS. I am still working on the proposal for the claims adjacent to Teuton's that are owned by John A. Chapman and KGE Management Ltd. and under option to North Pacific Alloys Limited (wholly owned subsidiary of Leader Mining International Inc. (see [www.leadermining.com](http://www.leadermining.com))). A first pass shows ~200 line km will be required to provide adequate coverage.
