TO: Rick Meyers of EI ( RMEYERS )  
CC: Bruce Madu of EI ( BMADU )  
CC: Jim Britton of EI ( JBRITTON )  
CC: Tom Schroeter of EI ( TSCHROETER )

Subject: Weekly Report

ADMINISTRATIVE

- \* YEP student Yana Preston now to start on May 5 and finish about Aug 20. (changed).
- \* KEG thank yous sent to speakers.
- \* responded to request for geol info for Lytton power plant proposal.

EXPLORATION HIGHLIGHTS

\* Rainbow #2 Zone (Teck/Getchell) - assays released last friday (April 17) for final 2 holes in program. Hole 5 was drilled right down the pipe and hit 369 m grading 0.662% Cu and 0.207 g/t Au starting at 28.7 m. This included 159 m grading 1.078% Cu and 0.322 g/t Au. The zone is still open beyond 400 m depth.

The grades are good but are probably subeconomic for underground mining. Teck also reported that Pt and Pd values were "insignificant" but this contradicts their earlier assays. There may have been some assaying problems somewhere...

\* J & L - NoW for \$2.9 million dollar u/g dev and drilling program received from Weymin Mining

\* Watson Bar (Stirrup Creek). Rudi Durfeld reports that 8 ddh have been drilled so far and is drilling is continuing. Some good results. Co. is considering spending up to \$1 m this year. I plan to meet with him in WL May 1-2 to work on details of Watson Bar paper.

\* Lac La Hache (GWR Resources) Dave Blann reports 2 ddh were drilled on the TT claims (Murphy Lake area). More IP and follow-up will be done here before more drilling takes place in summer. Drilling of 8 holes on the Peach Melba target is planned for mid May, depending on financing.

UPCOMING

- \* Prepare office space for Yana.
- \* Booth at Cariboo Mining and Logging show (May 1-3) in Williams Lake.

Mike
