LAC LA PUCHE

Dec. 19/08

- chat with Dave Blann

- Ann North - finished drilling in early  
Oct. just couldn't come with 'focused  
target(s) with grade (+ size).  
[TGS - still lots of room]

- Aurizon Gold zone (~ 1 km to south of  
abandoned)

- GWR/Dave Blann drilled one hole in  
Oct. (last hole) - hit intrusive bx.  
with fracture native copper + chalcocite  
(digenite?) in oxide (upper) zone.  
→ needs follow up!

→ GWR will have booth at Roundup

Lac La Pêche

Oct 18/00

- still drilling (Hole #24) on east  
side of <sup>main</sup> low

- 22 - write-off!

[TGS looked @ #21

- 800m strike length on proposed  
zone]

- 2 holes left? + 'stop'

est. exp. [\$300k] (DB)

~~LAE LA HAE HE~~

Sept. 7/00

- Hole #17 - No. of 18 → "good"
- Hole #8 - 250 - lost hole  
(Summer) (150m E of #15)
- Hole #19 (back) (behind #15 - due N, drilling)
- "Show + Tell" - Roundup ✓

# LAE LA HAETTE

Jan. 23/95

- chat with David Blann (Consultant)
- Regional Res. (von Reichardt) running current drill program. Based in 100 Mile House (Loach Inn)
- Dec. '94 + Jan. '95 : drilling Nemrude skarn
- late fall '94: drilled Miracle  $\text{Cu-Au}$  por.
  - good gold values (e.g. 3-4 g/t Au)
  - Cu values av. .17% to 0.2% Cu.
- Nov. '94: drilled geophys/geochem anomalies on ANTA (option) = good Au values!
- Analogy to Mt. Milligan? (same)
- 'Donut' IP expression.

165 → Spout Lk./  
Peach Lk.

Spout/Peach Lk.

Feb. 16/94

- spoke with Dave Dunn
- Dave Bland no longer 'in charge' (with?)  
project. i.e. being handled from  
Toronto - Strathcona Minerals  
(Graham Farquharson)
- Dave thinks whole area has potential  
for porphyry ± skarns!
- Huge Takomene Batholith  
is zoned (contrary to what  
others believed in the past)
