Subject: Northwest Geology Oct 31 2003

Correction to last report- Mary-Ann Poirier is Executive Director of the Old Fort band office, not Chief of Fort Babine band.

Thorn - Cangold and Rimfire announced a significant drill intersection from the Oban breccia zone from their 8 hole (875 m) program- 1.97 g/t gold, 190 g/t silver, 1.3% lead and 0.77% zinc across 14 meters. Thorn is located 125 km south of Atlin.

Foremore - Roca Mines reported assay intercepts from drill holes at the SG and BRT zones 50 km NNW of Eskay Creek. At BRT, 15.9 meters of banded semi-massive to massive pyrite was intersected in the best of 7 holes drilled below the surface showing of laminated pyrite-sphalerite-galena. A 2.3 meter interval graded 7.9 g/t gold, 22.6 g/t silver, <0.1% copper, 0.1% zinc. The good news is drilling revealed the zone is associated with a 40 meter thick pyritic felsic tuff unit, a horizon worthy of follow-up. Results at SG were mixed, 4 drill holes returned lower grade intercepts than surface channel cut samples-

- 2.0% Zn, 0.6% Pb, 10 g/t Ag, 0.13 g/t Au over 3.46 m (channel)
- 6.7% Zn, 2.3% Pb, 43 g/t Ag, 0.11 g/t Au over 1.82 m (channel)
- 3.5% Zn, 2.0% Pb, 30 g/t Ag, 0.17 g/t Au over 1.62 m (channel)
- 1.6% Zn, 0.9% Pb, 8 g/t Ag over 1.0 m (drill hole 1)
- 2.0% Zn, 0.4% Pb, 6 g/t Ag over 1.1 m (drill hole 2)

Difficulty in taking a representative surface sample of the gently dipping mineralized horizon is a possible explanation of the discrepancy in results.

Taurus - Navasota Resources drilled 13 holes (1950 m) on this bulk tonnage gold prospect near Cassiar.

Louise Lake (93L 079) - This copper-gold porphyry prospect 30 km west of Smithers was staked by Bernie Kreft when previous claims lapsed. The prospect has an estimated geological resource of 50 million tonnes of 0.3% Cu, 0.3 g/t Au.

Bob Creek - International Curator have deferred drilling to next year because the database for the property is incomplete. Two(?) key Royalstar 1990 drill holes were not filed for assessment. Bob Creek is located south of Houston.

Homestake Ridge - Bravo Venture Group plan a more extensive drill program in 2004 on this property 30 km south of Stewart. The company is encouraged by a drill intercept of 9.8 g/t gold over 3 metres in a quartz-pyrite stockwork and breccia at the contact of the Goldslide intrusion.

GJ (Kinaskan) - Airborne EM-mag survey completed in late October. Drill program anticipated in 2004.

Red Chris - bcMetals Corp. will begin a detailed feasibility study in January 2004, based on data collected during its \$4.3 million, 4-drill, field program, scheduled to conclude about Nov 10. Preliminary contact has been made by the company with the EA office, to re-enter the approval process.

Galore - SpectrumGold issued a press release on initial drilling results, featuring a spectacular intercept of 1.52 g/t gold and 1.16% copper over 164.4 meters in the core of the deposit. Hatch Engineering will complete an economic assessment and resource estimation by mid-2004.

Subject: Northwest Geology - Dec 5 2003

SIB - Heritage Explorations released results of 7 drill holes from its much-hyped Hexagon zone, an Eskay target derived from silt and rock geochemistry. Sericite-pyrite-quartz alteration and anomalous mercury, silver and arsenic occur in sheared Betty Creek strata between two parallel faults. The zone is 75 to 185 metres wide and traced nearly 4 km but gold is typically less than 1 g/t. Best intercept is 5.11 g/t Au over 2 metres. Silver values are correspondingly modest. More drilling is planned in 2004.

New Polaris - Drilling in progress on this mesothermal vein past-producer, located across the Tulsequah River from Tulsequah Chief. About 3 holes are planned.

Louise Lake - Assist consultant for a junior company that is considering option of this high-level copper-gold porphyry 30 km west of Smithers. Drilling by Global Mineral and Chemical Ltd. in 1996 (5 holes) and 1998 (3 holes) was not filed for assessment. The core is thought to be stored in Smithers.

VMS Talk - Update Ross Sherlock to prepare Roundup talk on VMS prospects in BC. Sherlock is ex-MDRU but currently employed in Nunavut.

Bradfield-Iskut Road - Respond to inquiries by consultants (GE Bridges in Victoria and McElhanney in Terrace) doing an economic assessment of this connector road to Alaska. Made previous studies done in 1991 and 1996 available to them.

Minerals North - Two planning meetings have been held for Smithers 2004, April 14-16. Committee comprises Robin Curry (Kemess), Jim Davidson (Town of Smithers), Sherri Howard and Brian Burrill (Chamber of Commerce), Edith MacKay (MLA office), Hans Smit and Daryl Hanson (Minerals North Association), Sharon Robertson (Nadina Community Futures), Darlene Glaim (Wetsuwet'en office) and Paul Wojdak (MEM).

Subject: RE: _Urgent Assist: North American Gem Inc. Background Info

Yes, I am familiar with this company, principally through press releases on its **Louise Lake** option (with **Firestone Ventures**), and previously up to 2005 when it had an option on the **Bonaparte** gold project, north of Kamloops. The President and Director of North America Gem Inc. is **Charles Desjardin**. I have never met this gentleman; however, I have met their QP, **Carl Schulze**. In general, I would say they have not been very communicative. Their news releases are the main source of info I get. They often repeat 'older' (stale) info to 'hype' up the project (?). **The single one thing that surprises me is that a new (revised) 43-101 compliant resource estimate has not been released for the Louise Lake project** (I have always liked its potential, but felt it lacked the technical and financial commitments that it deserves).
Dec. '04: North America Gem signed a Letter of Intent with Firestone Ventures (Edmonton) (on its Louise Lake project near Smithers).

Jan. '05: NA Gem signed formal option - over 5 years, can earn up to 75% of project, must incur \$2M in expl'n work and issue 1M common shares to Firestone. Carl Schulze, P.Geo. was designated the Qualified Person (and still is).

Apr. '05: At Calgary Mining Forum, I discussed the Louise Project with both Lori Walton (Firestone's V.P., Exploration and Business

Development) and a N.A. gem representative. I was told that they would conduct one more round of drilling to allow a scoping

study (and thus a 43-101 compliant resource estimate) to follow. 7 holes totalling 2512m were completed in Apr. '05, but no

further drilling was done later in '05 (only minor surface work) [i.e. couldn't raise \$; distracted by other projects?]

Dec. '05: NA Gem announced plans for early 2006 drilling program.

Jan. 26/06: NA Gem announced that it had started drilling at Louise Lake (planned 12ddh = 3750m).

Feb. 13/06: NA Gem reported that it had voluntarily suspended the drilling program at the "demand" of the Gitksan First Nation who

claimed they had been excluded from the normal government consultation procedures. NA Gem stated that it was ..."in no way responsible for this error". Regardless of this, I doubt very much that this company has had a good working relationship with the Gitksan (I could be wrong here; the Smithers office can maybe confirm?).
Firestone has holds the Morris gold project in the Chilcotin area; it recently dropped the Amazing Graze gold property, near Castlegar.

Hope this helps.

Tom:

Do you know this company? Who are its key personnel? They are currently drilling on Louise Lake property.

Any information appreciated.

Geoscience at your service!

early '04 - Firestone - 4-yr option 'ed (+ 6 ddk) = 1675m
www.northamericagem.com

Dec. '04 - NA Gem signed letter of intent with Firestone Ventures

last work on diamonds

(5-yr term - earn up to 75% of Louise Lk) → Carl Schutze, P. Geo. - @P
→ incur \$2M in work + issue 1M common shares to Firestone

Jan. 19/05 - signed formal option (over 7 yr)

[Louise Lk - 1st disc. in 1968 - 'Main zone'
1992 - Equity Ag: Gen. res. ~ 50 mtc. 3% Cu, 0.39% Au + 0.02% Mo

Calgary MEB - Apr. '05 : TOR - disc. with Firestone (+ NA Gem) → "1 more round of ddk in summer '05 → then a scoping study"

→ No 'new' resource est (since '92)

~~Charles Bejard, President, NA Gem, Inc. (ES&L Legend, D.R.) 1788-650 W. Georgia 604-683-5445
Lori Walton, V.P. Expl. & Bus. Dev. (Edmonton, Alberta)~~

→ Firestone also: Morris, BC + Amazing Grades
Cropped option Dec. '05

Apr. '05 - ddk prog. completed (7 ddk = 2,192m)
→ no further follow-up with Firestone '05 (planned but never carried out) - only surface work + Firestone - petrographs work

SW Dec. 8/05 "NA Gem plans Jan. ('06) ddk"

SW Jan. 26/06 "NA Gem starts ddk @ Louise Lk."
12 ddk = 3750 m
Main zone: min. 750m strike, depth: 250-270m

SW Feb. 13/06 "N.A. Gem takes a stand for mining resumes drilling"
- Gitzsaw First Nation demand to suspend oper. ("excl. from normal govt control")
"NA in no way responsible for this error."
