

LUCKY / TO Q Dec. 16/97

- between Kennedy Lk. camp (W) + Toquart Bay (E).
- office visit (Schroder + Piment) to KRL / Donegal (Shamus Young + Egil Ljugard).
- area of interest logged off - but new growth + mini-canyons in creeks a problem.
- Main area of interest = Mount Redford (circled by Baronne iron mine to west (skam))
- intrusive (dioritic) rk. with 'sheeted' veins of arsenopy + PY
- Polymetallic geochem - esp. As, Au + Cu, Zn
- Rhyolitic (Ter?) dyke/sill/plug with dissem. arsenopy. - Key/critical?
- Whole property requires detailed mapping + synthesis of soil + lake sed. geochem + airborne geophysics.
- [Good potential]

TOQ

Sept 20/00

- lunch with John Barakso
- minor prospecting
- wondering what to do next
(need #)
- JB convinced there is a 'buried' Hishikari.
