~~ACTION~~

Thanks - now the hard part. I will only be able to use ONE (1) photo (I may add some text on it) for my various presentations. Rather than me pick one, I prefer that you (individually or collectively) choose the one which you would be most pleased/proud to see me use. I look forward to your reply at your earliest convenience. Cheers.

Tom

Hello guys

Attached are some aerial photos of the Lucky Ship Project.

These have been reduced to send, if you want a couple I can send them in larger KB.

Hi Tom;

I'll get one for you. I don't have one myself but I think Bruce Graff got some yesterday when we flew a bunch of people around the site to look at possible sites for waste dumps and tailings confinement ponds. Paul Wojdak flew around the property this past summer and he may have one or two as well.

Don

Hello Tom:

Don likes Lucky Ship 3 because it shows the drill roads, I like looking north towards project or lucky ship 1 showing Nanika R.

Subject: Lucky Ship Visit on 13th-14th?

Dalton - got your Voicemail message. Sorry - can't squeeze in site visit, but would certainly be available to meet with Korean group prior to or after visit.

(± Thamlinsen Ck. - 14th?)

General - Another hectic week

Environmental Assessment

Swamp Point - Hans Smit (proponent project manager) reports that community meetings in Kincolith, Aiyansh and Stewart were well received.

Galore Ck - Met with Sue Craig to update on project and changes in MEMPR with respect to EA process for their project.

Permitting - Notices received this week: Mineral 6, Coal 0, Placer 0, Sand & Gravel 2.

Total Approvals/ Permits issued (year-to-date):

- Mineral - 93
- Coal - 1
- Placer - 52
- Sand & Gravel - 7

Tommy Jack - International Kodiak Resources has canceled its exploration plans in favour of exploration on other properties. No further consultation with GwininNixw is planned by MEMPR.

Hazelton Quarry (624364 BC Ltd) - GPS survey confirms the proposed quarry site is in an appropriate land zone and permit is ready to be issued.

Regional Geology

Terrace Project (GSB) - PJW and Frances Sharpe spent one full day participating in the project.

Dar - PJW and JoAnne Nelson (GSB) visited/ inspected Trade Wind Ventures trenching and drilling project. Target is a gold-bearing quartz vein associated with an aplite dike. The zone, generally 1-2 metres wide, is exposed over a strike length of 1.65 km and vertical range of 170 m by trenches and in an underground adit.

LCR - PJW and JoAnne Nelson (GSB) visited/ inspected Bootleg Exploration's trenching and drilling program (agent for Northern Continental). Target is a copper-moly porphyry deposit. Drilling will target the Shae occurrence, copper and moly soil anomalies, and a quartz stockwork zone.

Lucky Ship - PJW and Frances Sharpe visited/ inspected New Cantech's IP and 3000 meter drilling project. Target is a moly porphyry deposit, and specifically a near-surface deposit of sufficient grade to truck to Endako. Amax outlined a resource of 18 million tonnes at 0.1% Mo.

Health & Safety

Endako - Two dangerous occurrences: 1) an overhead hoist slipped from its mount and nearly struck a worker below, 2) a haul truck went off the road, but did not overturn and the driver was not injured. Preliminary suspicions are driver fell asleep at the wheel.

Eskay Creek - A 100 litre spill of sulphuric acid occurred when a small valve melted as a result of exposure to the acid. Spill was neutralized and contained by site ERT.

NEXT WEEK

June 27-29 - Interviews in Vancouver
June 27-29 - DWF and Caroline Nakasuka at Huckleberry Mine
June 30 - Bruce Graff last work day at MEMPR
June 30 - July PJW on Vacation

General

A good catch-up week as staff were close to the office and greatly reduced the backlog of NoW's. Elaine is catching up on long-overdue filing and updating of permitting files. Public Service week was observed with a MEM office lunch.

Walnut Park Public School - Grade 3 class instructed in rocks and minerals (P JW and FS)

Environmental Assessment

Swamp Point - Terms of Reference reviewed/developed in conference call (June 13).

Klappan - Agency site visit scheduled for July 21.

Galore Ck - Formal notice from NovaGold of revised access route.

Ruby Ck (formerly Adanac) - Adanac Molybdenum Corp entered the process, first meeting June 28 - DWF will attend.

Permitting - Notices received this week: Mineral 7, Placer 9, Sand & Gravel 0.

Total Approvals/ Permits issued (year-to-date):

- Mineral - 88
- Coal - 0
- Placer - 46
- Sand & Gravel - 5

Lucky Ship

Wetsuwet'en Consultation - Bruce Graff and P JW met with Office of the Wetsuwet'en - Chief Alphonse Gagnon, Andy George Jr (Lands & Resources Manager) and Walter Joseph (Fisheries Manager) on June 16 concerning (a) lack of response on all NoW's and (b) focus on **Lucky Ship** exploration project (New Cantech Ventures) where concern about fish values is known to be very high. **Background:** The majority of Wetsuwet'en salmon spawn in Nanika River near Lucky Ship. The Wetsuwet'en are upset that a large area including Burnie, Morice and Nanika lakes and western Tahtsa Reach was not recommended for Park status by the Morice LRMP. The government rep, Brian Fuhr (MSRM), agreed to close the area to logging but insisted it remain open to mining. Wetsuwet'en do not view mining favourably - eg. Huckleberry has not achieved their objective of 10% FN labour force. Lucky Ship was identified by Wetsuwet'en as an opportunity for the proponent to hire the FN fish biologist as part of a team assessing environmental conditions.

Tommy Jack Gitsan Consultation - GwininNitxw responded to June 8 meeting with a proposal for Cultural Heritage Inventory for the lower Tommy Jack - Sicintine area costing \$7774 (exclusive of helicopter) for consideration by International Kodiak Resources. Completion of such a survey is considered by GwininNitxw to be a starting point in consultation / negotiation of their approval for mineral exploration. MEM forwarded the proposal to the company, we await a response.

Hazelton Quarry (624364 BC Ltd) - Inspected by DWF. Permit is ready to be issued pending satisfactory determination of a land zoning boundary that will be done on June 20. Discussions by both DWF and P JW with MoTH have not been very satisfactory - they are not sympathetic to our concerns with accelerated permitting.

Regional Geology

Terrace Project (GSB) - P JW and FS met with JoAnne Nelson to plan input to the field program.

Molybdenum Project & Workshop - Frances Sharpe has begun a compilation / research project on molybdenum deposits in the region. A workshop is being planned for Sept 14-15 prior to the world-famous Smithers Exploration Golf Tournament. Everyone in the industry is invited to the tourney.
