

LUCKY SHIP

Sat. Sept. 16/06
Sun + 18°C

- New Canteen
- Look @ core in warehouse in Telkwa (behind Forestry)

Resource

55 Mt @ 0.07%
@ 0.03% Mo cut off

- part of SEX Tour

Host: Don MacIntyre
(+ Vic Parsons + John?)

→ Koreans looking at seriously
now looking @ possibility of
'standalone' mine

- Currently just completed
deep (~250m) hole - wanted to
go to 1100m

No bulk sa. this yr. (as orig.
planned) - may hinge on Koreans

- some core sa. shipped to Korea for testing

2006 DDH ~ 4400 m
[eq. > 200m @ 0.19% Mo]

2006 #52-68
2005 24-51

.06% Mo cut off used; but could
lower to 0.03%?

- minor rhenium credits on bench-scale
- Climax-type system net. test FIELD (S)

If Koreans decide to 'proceed'
- could go pretty quickly into
baseline studies → then EA
