

Mackenzie

Dec. 1/05

- chat with Jim Dawson <sup>(wealthy Min.)</sup> photos
- showed a binder with "coarse" gold grains (mineral gtz.) [CF Mineral Research - Kelowna - Fipke]
- Spent ~ \$500k in '05. Rev. SW - Nov. 17/05
- NW-trending belt ~ 90 km x 12 km
- Late Proterozoic clastic + carbonate sed. (M'sinchuk Gp)
- Located 6 anomalous drainages (Au my!)
- (15 x 80 sq. km)

Analogies: Sediment-hosted vein deposit (SHV)

- Bendigo - Belarus (Australia)
- Murumtau (Uzbekistan): 80 Moz Au
- Sukhoy Log (Russia): 20 Moz Au
- Macrae's Flat (NZ): 5 Moz Au

[examined by world expert - Dr. Paul Hipfel]

2006 - get back in early (June) + start following up anomalies.
