

MARA

July 30/86
Mined Quest
office

Host of Nicola
volcs
to SE

SW GRID - Mara II, III, IV

Tertiary

Maroon tuffs - better host
muds - unaltered } Interlayered
Greenish (illitic) - propylitic
Silic.

885247

Goldquest 'Partnership'

Qtz-carb.

190,000 ppb cose Au - highest

As, Sb, Hg
↓
1000 ppm 3 ppm

2 km x 1 km N-S anomaly

- Composites
- 100 ppb Hg
 - 3-6 ppm Sb
 - 15 ppm As

Northern Grid - 'sinter'
- bx.
- minor oxide

optioned to Procan = 9 holes
- East 'half' = 9 holes + 2
Mara V
+ KAM cls.

300 ft. holes

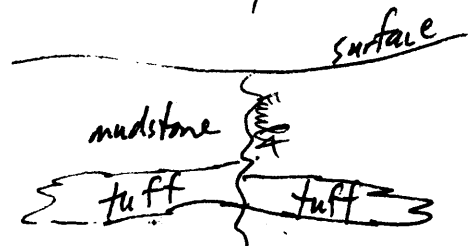

East Zone

4 1/2" reverse circulation
percussion @ 9.50/ft.
- coinc. As, Sb, Hg + minor Au
#5 - up to 90 ppb Au

4 km diam. alt'n zone
- carb-silica

Structure - N-S Airport fault - Nicola into Tertiary

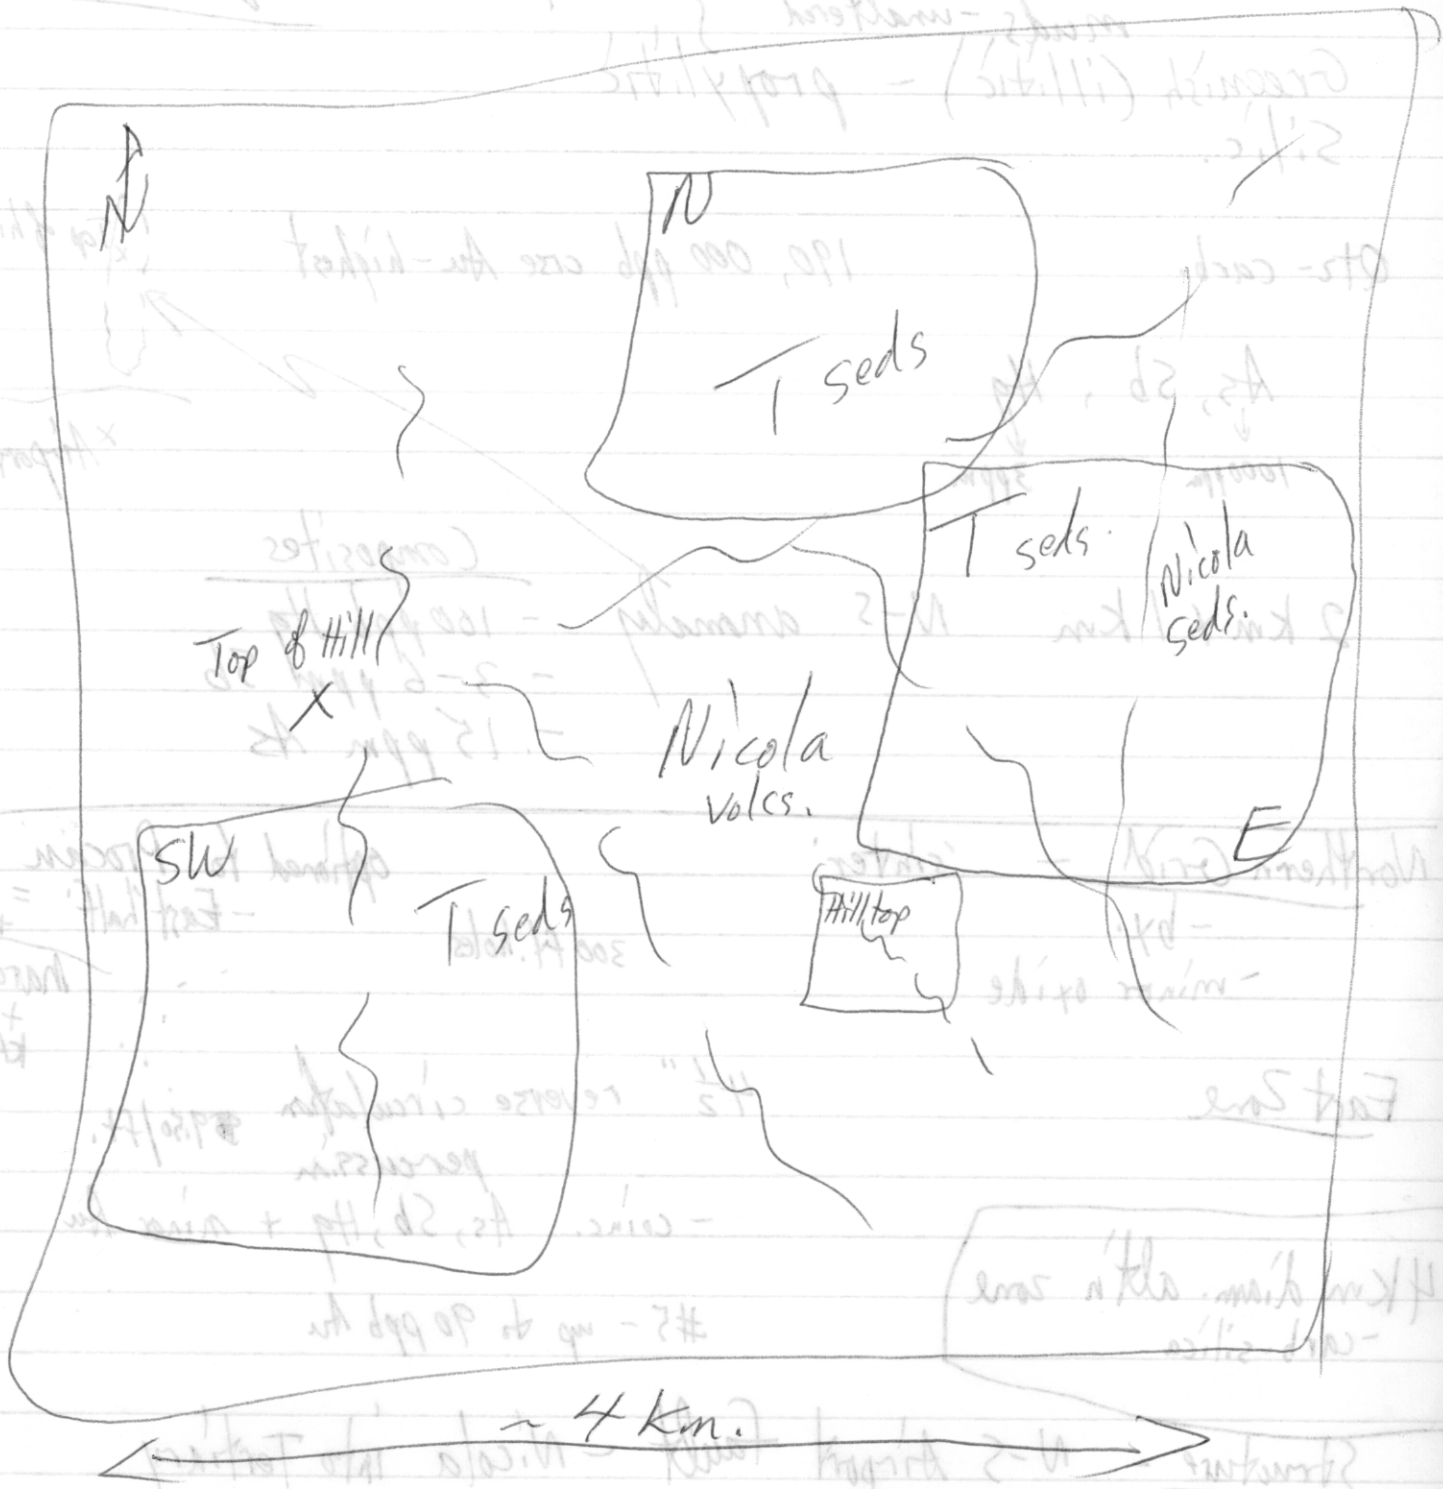

Target - lower tuff
