

MARMOT  
MT 940 005

Mon Aug. 14/92  
Sunny +25°C

- with Bob Lane, Larry Diakow, Bill McMillan
- Chalcoite + mal<sup>sp</sup> in N-S shear zone in Takla volcs. (+qtz + cal. vein)
- old rd. up to ridge - camp below (no sign of core)
- exposed shear is in steep N-side of ridge. Several (?) short ddh into shear.

Photo: Look W over, showing (+mal) - Niven Pk. gossan in bkgrd.

- bladed-trachytic texture in volcs <sup>sphenolitic</sup>

bladed pink fsp-por (fr. gr.) dikes into volcs + local 'sparnification' of contacts (i.e. epidote, ~~and other~~ <sup>radiating needles</sup>)

- old camp on top of ridge - a burnt-up mess (old spring beds + utensils)
