

Mineral Hill

885433

93L027,028

Visited Nov. 21/78

- Proposed 3 ddh each to 1000 ft.
- both pdh + ddh going on.
- > 'Great' distance between pdh + ddh
- looked at 500' of first hole = hornfelsed crystal tufts (green to grey) with good bleached gtz. stockwork with MoS_2 py + minor cpy. Several stages^(more than one) of min. gtz. veins.
- ab. hematite veinlets
- > Grade should be $> 0.1\% MoS_2$
- > See sketch map.

Thur. Dec. 7/78

- looked at core from 3rd holes - mainly all in good hornfels with good gtz. stockwork with observable MoS_2 .
- garnet, pyroxene + other skarn mins. ^{incl. andalusite}
- fluorite (colourless)
- Estimated grade = $> 0.10\% MoS_2$
- 3 holes are ~ 1 mile apart.
- alaskite is also min.
