

MISTY

Sun-Sept. 11/05
Sun/Cloud +13°C

- with Bob Lane
- via Interior Helicopters (was Luck)
- owners: Lorne Warren + was Luck
- [HDI / Teck Cominco looked e in '05]

~~Photo~~ new showing (mal. ^{in position}) on cliff face near top (south) of nice lake

- + Teck crew - Gwagme, Evans, Fioravola, Ghette Carter, Jessica (Australian)

Bornite (filled), breccia of
fri-qs. orange-pink leucocratic
Syenite

lineation + banding of
lighter-colored "melanosyenite"
along lineation (more quartz)
plains, i.e. movement along
fabric in rock during metasomatism.

- Brown garnets

* Earlier work: 1972 trenching,
but interest waned + claims lapsed

- GE sees strong structural (NW)
control → esp. along SW margin
of Duckling Ck. syenite - heads SE to
Two Good area ✓
