MOSQUITO KING

Cec/pane

Zn + Pb + Ag + (Au)

- mineral occurs at contact of volcs. + 1st.

Consultant  
- Jim McDougall

(Fagle Bay Empire)

- Au values in sul. above 'mineral zone' (eg. 27 Au, 1.5 Ag)

- central part to 24% As

'Spar'

- geophysics support closed anticline

- ind. drag folding

If anomaly to be tested

Fox cl.

1800 tons mined - poor met. recovery (As)

- concentrate not processed yet

6 to 24%

Problems - very tight isoclinal folding (esp. in 1st.)

POOR TALK

POOR POTENTIAL
