MR

May 20/92

- No-seem' silver in Skeena Gp. sediments (à la Fireweed)
 - up to 100g/t Ag but do not know silver mineral
 - think related to large-scale structure + buried intrusive
 - ab. carbonate alt'n.
 - Trevor thinks there is a large-scale fold
-

~40 metres wide x 600 m long
x 200 m deep
~8 m tons

av. 40 g Ag / 1% Cu / 15% Zn
