PRESS RELEASE April 30, 1996

Munro Lake B.C. Drill Program Planned

The company has received \$260,000.00 from Lausanne Minerals to fund a phase I drilling Program on the Munro Lake Gold - Silver Copper prospect near Summerland B.C. The property is about twelve miles south of the old Brenda Mine in a similar setting.

Induced Polarization surveys have outlined several vein type targets and a large porphyry style target that is up to one kilometre wide by two kilometres long associated with gold and silver geochemical highs. Molybdenum, copper and zinc are also anomalous. To earn a 50% interest in the property, Lausanne must advance a total of \$500,000 and make certain payments. Almaden is the operator of the program.

Drill permits are in place and the program will start as soon as spring weather conditions permit.

On behalf of the Board,

Duane Poliquin, P.Eng.
President

Properties:

Mexico

LA TRINIDAD, (gold property) 80 miles S.E. of Mazatlan. Almaden acquired La Trinidad property and entered into a joint venture agreement with Eldorado Gold Corporation. Almaden retains a 49% working interest after Eldorado recovers startup costs. A reserve of 173,000 ounces has been outlined with high potential for reserve expansion. Mine Construction has started with a gold loan from N.M. Rothschild & Sons. First gold pour is expected in 3rd quarter 1996.

EL ENCUESTRO, (gold property) 200 miles north of Mazatlan. Joint ventured with Eldorado Gold Corporation, Almaden is carried to feasibility for 40%. Trenching planned on large breccia zone 1996.
