Priorities for coming week:

Preparation of materials for Victoria meeting on 28-30th October.
Confirm status of outstanding active projects
Christy in Victoria
Industrial Mineral Conference (Christy)

Status:

Central Coast LRMP meeting with industry scheduled for 20th October at the BCYCM. Rolf and I expect reps from most of the active companies. We want to know what they consider to be important in each of the designated planning areas and what wording they want to see in the final document.

Dani Alldrick has resolved most of the "boundary fault" issues between Central Coast and Cariboo. This will improve the credibility and appearance of Mapguide. Ward will implement the changes when he can.

Exploration Review and Victoria presentation figures, graphs and slides well on the way. Pamela's arrival has speeded up the process considerably.

Southwestern Region Exploration Review and Victoria presentation figures and slides less advanced.

GSB Poster Displays still to come.

Operational Issues:

Absences the next week or two are going to leave the office understaffed.

Note: Jo Sheared is tied up with the Industrial Minerals Conference next week, so isn't available to show us around Slesse. I suggest we wait until after the Victoria meeting.

Note: Nucanolan Resources is currently drilling at Lara. Greg Carriere has suggested that I join him for a visit on 3rd November. I will put in a request form today.

Note: Boliden-Westmin has had another good hit in the Marshall zone at Myra Falls (not releasing assays though!). The company will spend around \$4.2 million this year!
