

# MYOFF CK

May 3/02

→ chat with Jim Miller Tait  
 → recent 'analysis' @ UBC (by Brazilian  
 expertise)  
 → 42%  $P_2O_5$ , assoc.  
 with apatite

i.e. Ta/Nb — not primary target (now).  
Potential: Large tonnage, open-pit table,  
 low-grade  $P_2O_5$  + assoc. rare earths

in field with Cathro July 10/01  
 - Cross Lk. (Jim Miller-Tait)  
 stating that this (Myoff Ck.  
 aka REN) carbonate is  
 the 'best' (Ta, Nb) in BC.  
 (i.e. thickest)  
 - hope to drill!
