WEST MIN

Aug. 27/89
Sunny 25°C

- Jim McMillan (Kitsault, Maricopa)
- Cliff Pearson → tour w/G
- Paul Bugg
- Brian Jeffries

Surface = 12 Level

PHOTO - looking SE towards Price Mine

20 level - 333 Slope

PHOTO 1 - Bx + sul. fragst rhy
fragst.

PHOTO 2 - Ands. dyke in FW
- sul. above (stringer type)

- Headed north to expl'n area
(north lens) + then east
along 'south lens'

21-398 XCN

PHOTO 3 Bx. with sul. fragst rhy

885849

PHOTOS M.S. + FW on schist
(+ copy 'stringers') - contact
~22 Level 5368 slope
+ Tennantite (?) in FW

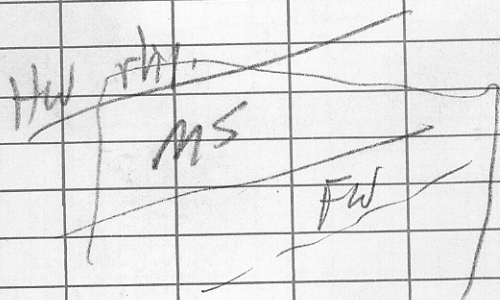

PHOTO - 'Fixing' loose back in
HW

Return from 21 Level

21-332 slope - good ore clast
bx.

- some local minor tight folding in sulphide

- MS - well banded

* Massive sulphide bearing clast
bx 'above' ore.

HV MINE

AD

②

Area of 4/5 Expl'n Drilling (w/ yr. program)

East Road

Suspected DPE
(North Lane)

DPE

N

DPE
(South Lane)

HW

Suspected symmetric
Zn-rich

Ca-rich

Zn-rich

East Fault

- Bruce Jeffery
- Examine core from 'North' lens ⁽³⁾
on east end of HW deposit
- good M.S. - sharp with
FW andesite (ie. no stringer
zone or bleaching)
- good rhy. bx. + M.S. chert
bx.
- V.G. observed, esp. with bn
- Argillite interbanded (eg 1 to 5m)
in rhyolite
- QFP dyke (dome?) intrudes
from east.

NOTE: Send Bruce + Expl'n staff
list of core shack '88
+ possible HW core shack?
(only brand sa. 4 yrs. ago).
