Dear Sirs:

Re: Property Visit to Polaris-Taku Site - August 16-18th

I am planning to visit the Tulsequah area (from Atlin) during the period August 16-18th inclusive. I have made arrangements to visit the Tulsequah Chief project and would like to do the same for the Polaris-Taku project. As District Geologist with the Ministry of Energy, Mines and Petroleum Resources based in Smithers in the 70's and early '80's, I took the opportunity to visit the Tulsequah area several times. One such visit was with the late Jim Hutter who was a Mines Inspector in the Smithers office. It was a particularly informative visit because Mr. Hutter was the last Mine Manager at the Polaris-Taku Mine before it closed. During my brief visits to Tulsequah I never had the time or opportunity to go underground, so I would love to do so this year.

Depending on Suntac's schedule, I would very much appreciate a visit in the field sometime between August 16-18 inclusive. Further, if appropriate, I would appreciate a brief update in the Vancouver office sometime before heading North in early August.

Good luck with the project.

Yours sincerely,

Tom Schroeter, P.Eng.
Senior Regional Geologist
