# OLD NICK

May 7/96  
SNOW + 5°C

- Larry Jones, Gerry Ray, Trygve Hoy, Paul Wilton, Mike Cathro
- John Chapman (Gold City Mining) Kenmore
- Frank (metallurgist) San Francisco Guy F. Atkinson Kenmore

- nice 'field guide' prepared/handed out by Gold City

Ref: AR # 1243 (Newmont)

acidic leach tests - followed by SX-EW treatment (at UBC?) if it works (similar to por. coppers), (+bacteria)

Current geol. drill ind. = 15 m tons

geol. poss. = 30 m tons

20,000 TPD ~ \$260 capital cost for mill.

[Need ~ 70 m tons]

- electrowin right on property!
- intriguing 'wavy' texture in Anarschite gtzite

Egil Livgard - cons.

Ni in a) gtzite b) dumite/peridotite

82ESW096  
886245

- next phase of drilling (~4000')  
will be for metallurgical tests  
(incl. 1 hole in serpentine)
