

Old Nick

886246

July 10/96

- John Chapman
- Drilling finished 6 ddh ~ 1000m (for met. samples)
- metaseds. — no ultramatics, where expected = surprise!

July 18/96 — John Chapman
5-10% massive po. in 400 feet of ms

- column tests in progress
- SX-EW — testing by UBC to follow (Aug.)

Info faxed to John Harvey — Feb. 3/97

June 27/97 John Chapman — post-BEX funding problems
for AMT

- SNC Lavalin having a look at next week
- may invest some \$ (key on metallurgy)

John Chapman /

OLD NICK

May 31/96

- tel. chat with John Chapman
- JC questioned purpose of Gerry Ray's (hosting) trip with Breepart Mc Moran. (FMC)
- FMC personnel think the Old Nick is a vented ophiolite (collisional terranes) sequence on seafloor → belt extends S into Washington.
- ↳ "Quartzites" are actually ~~stone~~ 'deformed' silica from seafloor/seawater.
- Folding is actually ^{deformed} 'sedimentary slumping' (i.e. NOT metamorphic)
- FMC like presence of listwanite float regionally.
- Ni + Co 'sweated' out of ophiolite suite.

'Partnership' meeting

Mar. 5/97

OLD NICK

- ultramafics (up to 40% Ni) in bedrock of placer workings on Billy Cr.
(up to 80ft across) Placer Dome (1964)

Saltchuck Pt.

(rusty) green "quartzite" (still not sure what it is!)

Newmont - percussion drilling

- "dykes" of ultrabasic rx. cutting "green gtzite"

bio-leach tests 30 yrs. ago. Could not int. soly but couldn't recover it!

- package ~ 100m

Livgard theory: - top part of gtzite more siliceous

(silicification) → lateritic

cf. Bubar prop. - NE of Rak Cr. (lateritic?)

"green" = sericitic to mariposite

→ see Mintile

→ AMT ID. (opt.)

Glaciation: N → S

Fox. Recommends more geochem vs IP

TS - what about REE ratios (ie. ultramafics vs metaseds)

Nixon: Partnerships? - handout (Draft)

→ Nickel program

- local rancher lady (geol. with exp. in Ni - of. Vorse Bay)

Castle Mtn. (Ni - diamond) near Christina Lk.

- need list of priorities

problem - conflict of interest re. finding something off cb.

(ie. needs official release rather than turn into over to company)

- M.S. candidate?

→ Chapman wants to update old Mintile descriptions

(Graham only wants to stick to Ni - prop.)

Timing: end May - early June (GN), early May (EL).

→ check with Lasmasis re - Ni in N. Wash

MEG

Brian Abraham?
- PD A Hecker?
OS

1. Welcome - TGS filling in for Chair - Walton & Vice-Chair - Cameron
2. New Members?
3. Announcements
 - a) MDRU - Thompson
 - b) MEG Directors - updates - outside table
- "anything" - forms outside
- 3a: Title & Speaker.
4. Intro: Lindsay Bottomer
5. ~~Next~~ Questions
6. Thanks: Gerry Carlson
7. Next Meeting: Wed Mar 19th

Old Nick

Oct. 11/96

- John Chapman, tel.

good metallurgical results (Dressinger)
- haven't started SX-EW testing
