

METRIC (S)
FIELD (C)

~~WILLOW CREEK~~

Mon. Aug. 23/05
Sunny + 22°C

(~3 hrs drive from PG) - PINE PASS (N. of Banck)
with Bob Lane (+ Jenny) [ML 0930 007]
Hosts: Graham McKenzie (Falls Mtn. Coal) mine mgr.
SOS Drilling + Ray Budget: \$2.5M [~12,000 cost]

52 holes completed to date

(~250m each) [18 core holes] = 12,000
→ will be total ~55 holes; Phase II = 15-20 holes

Target: 3 'thick' seams - structural & complex - folding + faulting

[#s 60, 72, 78] ddh - 300-m spacing, then infill

ex-Shell project target - mainly metallurgical (cf. PCI) some minor PCI
Coal. (i.e. 'blended' varieties à la Evco)

Issue: Continuity (+ structure) Swell (ratio) - looking for "12"

43-121 holes @ high ratio
2003 thrust fault 5 km x 500m (2 areas) - constrained by parallel lines on both sides

DDH-040 - grad 'surprise' (NE area) (near PP-83-1)

[Hope to enter EA for 1 mt/yr. operation]

NTS 930/09W 55°36'N 122°20.4'W [OVER]
~ 97 km W of Chetwynd

930 007
