Aumega Discoveries Ltd. (TSX.V: AUM) is a Canadian based junior resource Company publicly traded on the TSX Venture Exchange. The Company is focused on the exploration and development of advanced and known mineral deposits throughout North America, with its primary focus being British Columbia. Aumega currently has a 50% interest in the Poplar Deposit, an advanced stage copper/moly porphyry deposit located in Houston, BC. The Company also holds 100% interest in the Kelly Creek project, a high-grade copper/silver project located 28 km southeast of Terrace, BC.

POPLAR PROPERTY

The Poplar Property consists of 62 claim units and/or fractions and is located on the north side of Poplar Lake about 75 kilometers south of Houston, BC. The Poplar porphyry deposit lies within the strongly mineralized Intermontane Belt east of the Coast Crystalline Belt which hosts several significant porphyry copper-gold-molybdenum deposits including Huckleberry, Whiting Creek, Berg and Ox Lake.

The Poplar Deposit hosts an estimated **116,000,000 tonnes grading 0.32% copper, 0.1 g/t gold, and 0.009% Mo.** (at 0.20% copper cut-off grade). (Drummond, 1991) *Technical report POPLAR COPPER-MOLYBDENUM PORPHYRY – B.J. Price Geological Consultants Inc. Barry James Price, B.Sc., M.Sc., P.Geo. (Approximately 800 Million lbs. of copper)*

Within the above resource, an estimated additional higher-grade near-surface mineral resource of about **40 million tonnes of 0.40% copper** (Drummond, 1991). This near surface indicated mineral resource could likely be expanded with further in-fill drilling. *Technical report POPLAR COPPER-MOLYBDENUM PORPHYRY – B.J. Price Geological Consultants Inc. Barry James Price, B.Sc., M.Sc., P.Geo. (Approximately 350 Million lbs. of copper)*

POPLAR POTENTIAL AND STRATEGY

Potential exists for several hundred million tonnes of mineralization in the combined **Main and East zones.** *Technical report POPLAR COPPER-MOLYBDENUM PORPHYRY – B.J. Price Geological Consultants Inc. Barry James Price, B.Sc., M.Sc., P.Geo.*

“The near surface indicated mineral resource (40m tonnes of 0.40%Cu) could likely be expanded with further in-fill drilling.” *Technical report POPLAR COPPER-MOLYBDENUM PORPHYRY – B.J. Price Geological Consultants Inc. Barry James Price, B.Sc., M.Sc., P.Geo. *350 Million lbs. of copper*

“The mineral potential of the Poplar Deposit could be in excess of 400 million tonnes and is still open at depth and along strike as the continuation of copper mineralization to the west, north and south has never been drill tested.” *Stated by A.D. Drummond, Ph.D., P.Eng. in his 1991 report from New Canamin Resources Ltd.*

**THE
COMING
COPPER CRUNCH**

“...With the current growth rate in demand for copper running at over 400,000 tonnes annually, even assuming all capacity is brought on line, within 3 to 4 years available supply will not be able to meet world demand. Why the looming imbalance? As is so often the case these days, look to China and India, where the rush to build the infrastructure necessary to sustain economic growth is soaking up commodities on a global scale. It is a very good time to start paying attention to copper...”-Doug Casey, www.caseyresearch.com

KELLY CREEK PROPERTY

High Grade Copper/Silver Project

On August 18, 2004 Aumega Discoveries signed an option to acquire 100% interest in the Kelly Creek Project, located 28 km southeast of Terrace BC.

Over \$1 million was spent on the property from 1964 to 1971 and 1980 to 1981; the property has remained idle since. Earlier work included diamond drilling and the driving of a 300-meter (1000 ft) adit into the upper of the two main showings. Both of these zones remain open along strike and at depth. Mineralization consists mainly of bornite, chalcocite, and chalcopryite with pyrite.

Some of the notable intercepts include, a **15.2-metre** drill intersection which assayed **4.83% copper, 163.5g/t silver** and **2.7g/t gold** and another a **34.7 metre** drill intersection assayed **1.22% copper** and **27.5g/t silver**.

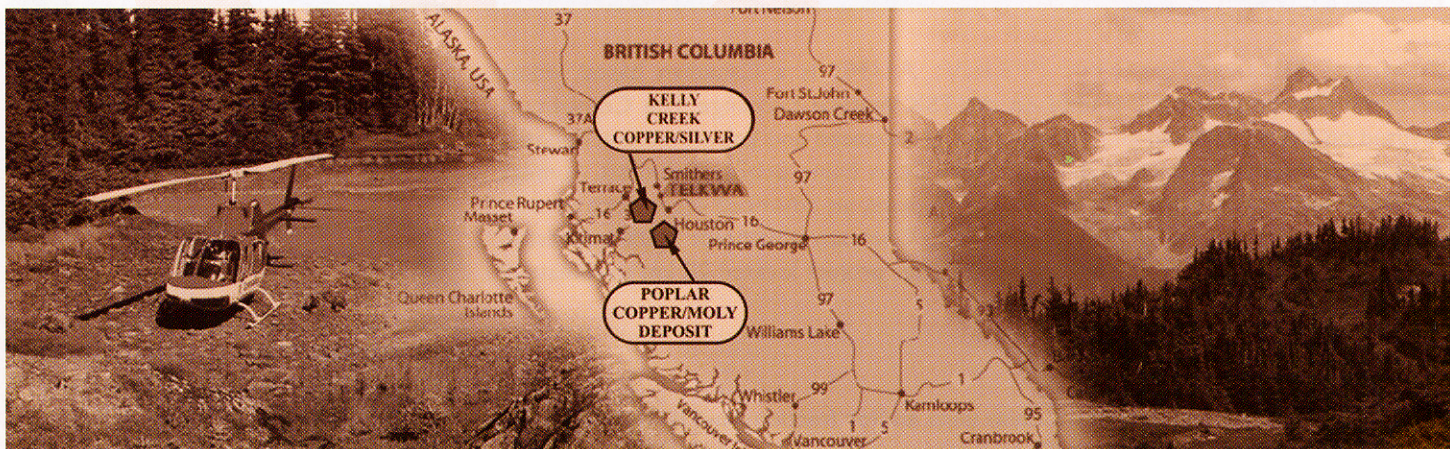

KELLY CREEK POTENTIAL

The style of mineralization of Kelly Creek has been classified by previous workers as that of a Volcanic Redbed class of deposit, which may be compared to the Sustut Copper project in BC. Mr. Peter Delancey, P. Eng stated in his 1990 report for Imperial Metals Corporation that "This type of deposit generally ranges in size from 1 to 10 million tonnes although there are a few deposits that contain 30-50 million tonnes. Copper grades range from 0.6 to 4.0% Cu."

There are several other areas of similar style mineralization reported on the property but have received little work other than minor surface rock chip sampling.

WORK PROGRAM

The Company is currently obtaining all the required permits and will commence phase one of its work program on the Poplar Deposit in the fall. For more information on the planned work programs please contact the company.

MANAGEMENT

Mr. Stephen Stanley - President & CEO

Mr. Stanley has over ten years experience in finance and business development with both public and private companies. Mr. Stanley's primary focus has been in the resource sector; he has acted as both a market and business development consultant for several junior mining companies listed on the TSX Venture Exchange.

Mr. Michael d'Abadie - CFO

Mr. d'Abadie spent 3 years with the Vancouver Stock Exchange and was CFO for Haywood Securities Inc from 1986 to 1989, at which time he resigned that position, and has managed his own accounting practice since.

Mr. Benjamin Ainsworth, MA (Oxon), PEng.-VP of Exploration

Ben Ainsworth earned an honors degree in Geology at Oxford in 1962. In the 21 years with Placer, he carried out mineral exploration work in Canada and throughout the world. His consulting company Ainsworth-Jenkins Holdings Inc worked with New Canamin in 1991 to 1994 to bring about the reactivation of the Huckleberry porphyry copper/gold project 35 km from Aumega's Poplar Project.

Mrs. Janet L. Horbulyk - Corporate Secretary

Janet has over 15 years of experience with security regulations including 7 years with the listing department of the Vancouver Stock Exchange. She is also corporate secretary for International Taurus Resources Inc., and Medallion Resources Ltd. since February 13, 1995 and Scorpio Mining Corporation since October 23, 2002.
