QCM Gold Project - B.C.

- Over 100 years of placer mining in the area surrounding QCM
- Nearby is one of B.C.'s oldest placer operations
- Little drilling to date on QCM property
- Drilling in 1983 by Ananconda intersected 1.0 g/t Au over 82.3 m
- Large untested gold-in-soil anomaly
- Gold in rock has a background of 0.25 g/t Au.

Historic Mining Area

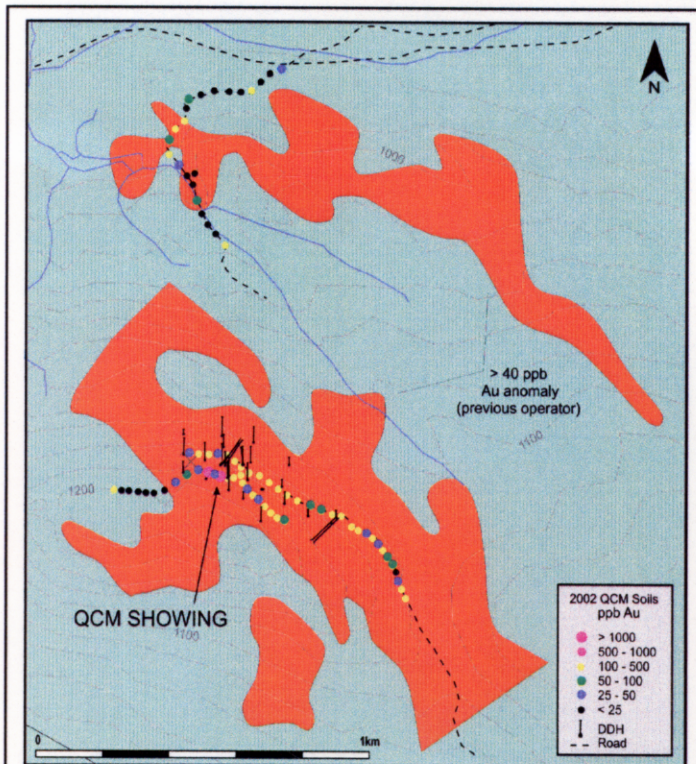

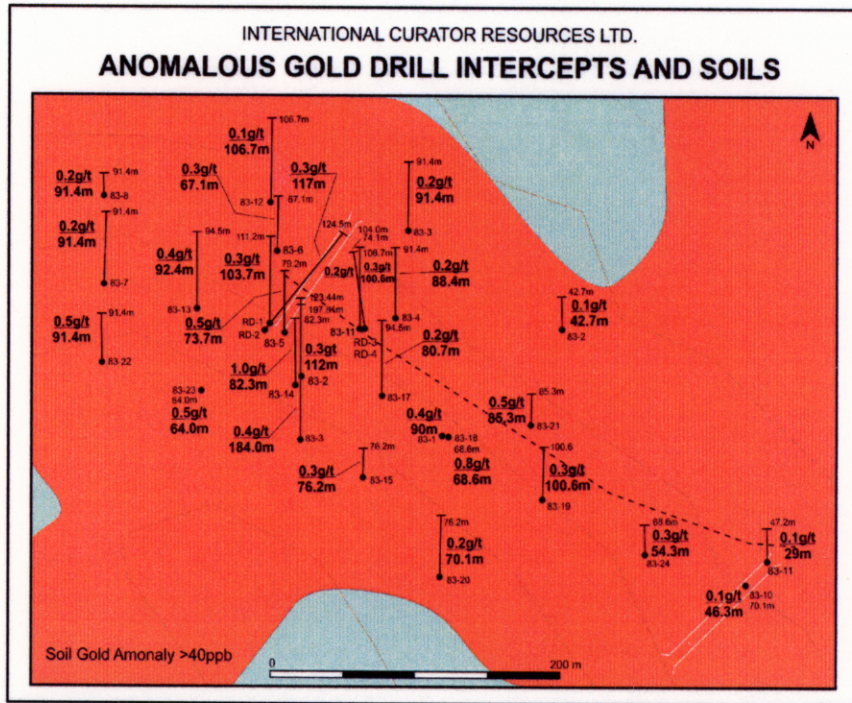

QCM
"Quartz-Carbonate-Mariposite"
TGS - similar to Taurus?

2003 Fall Work program

- Acquire prior reports
- Data compilation
- Surface program (geochem)
- Set up to drill next summer

QCM Gold Project - B.C.

Soil Sample - 4 g/t Au
