137. Propylitic (epidote-rich) basalt, QR

886635

CUSTOM CLR1321510 0163

A photograph of a dark, textured rock specimen, likely a mineral sample. The rock has a mottled appearance with shades of dark green, black, and brown. There are some lighter, yellowish-brown spots scattered across the surface. The texture is rough and crystalline. Two handwritten labels in black ink are visible: 'PYRITE' on the left and 'EPIDOTE' on the right. A small black arrow points upwards from the 'PYRITE' label towards a small, bright, yellowish-brown spot on the rock's surface. The background is dark and out of focus, suggesting an outdoor setting with some foliage.
