Dear Rob:

Re: QUET PROPERTY

I am interested in the geologic setting of the QUET property, particularly the association with the Gambier Group volcanics and the possible analogy to the famous Britannia Mine. I have some knowledge, both field and literature, of the area north of Vancouver to Whistler and would like to broaden my knowledge eastwards to the Harrison Lake area. Thus, I request permission to visit the property, preferably in the accompaniment of a Noranda or Aranlee staff geologist (yourself?).

I also wonder if there are any specific base maps I should or could obtain to make my brief visit more effective? In addition, I would like to take you up on your invitation to examine a suite of rocks from the property at whatever time might be convenient to you. Please let me know the appropriate time.

As usual, any information gained would be treated with the strictest confidence. Should any written or verbal presentation be contemplated permission would, of course, be obtained in advance.

Thanks for your assistance.

Yours truly,

Tom Schroeter, P.Eng.  
Senior Regional Geologist
