

Raven

886791

RAVEN (Vancouver Island) Aug. 1/01

- office disc. with Paul Metcalfe
(part owner with Michael)
- soil sq. in Feb. '01 'failed'
- However, in June - traced float
to 'W' (from Ewart Lk.) - disc. of
arsenopyrite (+ ~0.5 g/t Au) in buff
coloured, silicified metaseds (Sicker Gr)
- min. appears to be stratiform/skarn
(ie. syngenetic or v-mes.)
@ 315'0
- Cream Minerals (Frank Lang) [options] - no \$
to further fund.
- To west over ridge top is Pacific
ocean (very visual 'problem') - also
heavily treed.
- Access is a problem i.e. need logging rd.
