

886806

R.D.V.

Thursday 17/6

- with Paul Wojdak & Bill Pardee
- Murray Jones, Equity Firm (+ Alan Simmond)
- Eskay, Ck. targeted
- Northgate (option)

Sun/Cloud/Rain
+18°C
70 people in camp

- on 4th hole - drift (Griffiths N)
- First 3 holes targeting sed. unit in rhyolite
- looking for a basin
- Pb-isotope date ~176 Ma (Eskay Ck. age)

est ~ \$850k ~ 1300m (total) drilling
+ \$110k airborne (ie. lots of problems drilling)
Total Exp. ~ \$1M

Questy/ly

"nest" intrusion into wet sed. in #3

Rita - excellent cook - looking for fall job
with company
with John & Marie
& Gayle & U

- look at core, esp.

Photo: Rhyolite bk (green is sericite)
'pepperite'
@ 153m
- fr. pyrite in matrix of breccia
(any precious metal values?)

AS
P14115
no drill only
ride-end of section
\$100k new (net \$1M)

"juicy" section but needs grade!

RDN

Monday 26/04

Sunny + 26°C

- Karl - Clapper (Inter. of Horn)
 - Bob Quinn (with Paul Wosdak)
 - Murray Jones (Equity Eng.)
- WEDGE zone (just north of toe of ^{Glacial} ~~carass~~ ^{barred} ~~carass~~ ^{fault})
- Start 04-31 + 32 + 33 (on east side of ^{barred} ~~carass~~ ^{fault})
- fill in holes at north end
 - min. assoc. with dacite
 - ab. sericite \pm iron-carb. altho
 - look @ 04-31 (in 4th hole)
 - o/v problems
 - minor sects of sulphides (Fe + Cu)
- ~14 people in camp

Then - 1 hole on Jungle front

- 1 hole 'below' Marcasite (asse. zone (i.e. re-interpreted dip))

- 'lost' 7 boxes of core during hell-slinging

Note: Karl (Inter. or Heli) gave us a free ride (28 min)

R.D.N.

Sept. 16/02

- Ian Dunlop / Alpha Bushmen (+ Paul Wajdak)
- north of More Ck.
- Eskay Ck. stratigraphy - confirmed (on Arctic cls.) = "North Rhyolite" zone
- [ID - best rhyolite in Eskay camp]

Bill Wade "sinter" ^{AP #19,216}
 (very high Hg) - on MORE cks.
 (Barrick) - June '02

Focus ① Junk anomaly
 ~ 900m total
 (only 2 holes into bedrock
 i.e. rest "lost" in slide blocks)
 (CANCELLED by Alex Davidson)

- ② Dave Kuran's stratigraphy
- ③ Wedge zone

- Alex Davidson (Barrick) wants them to "groom" project for drilling next yr.

- \$25K option payment to RR in the due
 LEVEL (S) Dec. 31/02 / Camp eaten away by creek

(1)

RDN

Max. Spt. 10/01
Cloud/Rain
+15°C

- Newmont (Mike Stammers) + Nicole (20-000) + Al Montgomery
- Paul Wojdak
- Picked up @ Bell II Lodge (chopper came from RDN camp)
- pilot - Delmar (Capital Helo.)

WEDGE ZONE (~ 1/2 hr. flight)

DD# #11 - Release hole
 - tetrahedrite - Tennantite + ZnS + (Au)
 (#17, #20 to cast - under)

Carcass Ck. #20 to ~ 30m deep.

Drill E → W

→ Sequence is overturned
 i.e. dacite → Rhy → Mudstone

- 'Pepperite' (?) - near rhy - needs the current

[Sb, Te, Bi - anom. pathfinder]

- also Hg (redox slope) 2001 dth immed. north of old Noranda holes - just below glacier.

LEVEL (S)

R.D. & S. LTD., MADE IN VANCOUVER, CANADA
DUKSBAK WATERPROOF

② #20 - 331 ft - 1 ft. vein
of ZnS + PbS + cpx in gts
in 'dacite'

#17 ~ 335 ft massive sulfide - cpx, ZnS, PbS, Au
0.5 m 4.1 g/t Au; 6 ppm Ag
3000 ppm Cu; 900 ppm Pb
> 10,000 ppm Zn
(+ As, Bi, ¹¹²Hg, ^{10.6}ppm, Mo, Sb, Te)
~ 900 ppm

Chemex
#997

#17 ~ 365 ft - 3.7 g/t Au + cpx + PbS + ZnS
in 'rhynolite'

→ northern (downslope) most ddh

DH #13 - pervasive alt in
'dacite' - green sericite + py
+ 'leucopene' + ZnS + PbS

→ + tetra-tenn + native Bi
Petrographic + 'sig.' cpx

Phase 1 \$725k

Phase 2 \$325k - 4000 ft. ddh

Total = \$650k

Note: program (2nd phase) to be completed
by W/E - Richard Gordon (Newman) to visit
later this week. Nice Camp!

①

RDN

Mon. Aug. 30/99

- Wodak; Graeme Evans (Tech) cloud, sun 7:50
 Yoshi - Van Is. Mark Bakness,
 - 10 min. flight from Bob Quinn Dave Cantfield,
 Henry Armstrong
 Tom Bell

- Bs to tholeitic chemical sum. to Eskay
 Felsics = Dilworth Fm.

Jungle anomaly - ddh abandoned @ 180' ^{near ground}

Marcasite Gossan - ddh in argill.

- strat. dips - 50° to E
 (anticline)

Jungle anomaly

try again

R6-90-12, 13 - Noranda

- '99 target on Au-As soils
 in argillite. NE trend

- Hematite (maroon rocks) = subaerial
 (not Betty (K. Fm) - also contain
 frags of megacrysts, K-spar
 por (à la Premier/Sulphurite)

- Barite geochem (+Pb, Zn, Cu)

WEDGE - "VEINS" - in dacite

② Noranda - 20 dth in '90, '91

RDN 11 - possible Eskay target + veins

RDN 12 ✓

91-21 - best hole 1.95m @ 10.1.1991

Main Zone drilled 2 holes
11m wide (Northy part)

2 Drills on site

Small drill → veins (8tz)
eq. Main zone (2 dth)

RDN 9
RDN 10

① hole 7m → PbS, ZnS, cpx, etc.
just south of Main zone

① hole just north of wedge 2,
(all ~ 100 ft. holes)

Eskay Target

1) Single anomaly 150' - abandoned

2) Set up ~ 25m to E + drill
again (vertical)

Felsics → felsics (hgt. veins) → target

3) + 4) Marcasite Gossan - 'main' veins

① Maracite Gossan
pepperitic text. - felsics intr.
into unconol. sedk.

(i.e. seafloor interface)
- contact of felsic + overlying
bs/ts. (tholeiitic) - à la Eskola

99-05 incl. 1m of foss. / bit
(+ 'orange' mineral - realgar?)

Budget
\$300k ~ 2100ft. ddh (640m)

Upper Maracite zone
- Bx (angular) qtz vein
(stop)

RDN 99-05 - Maracite Gossan zone

Wed. Sep. 1/99 - Mark + Dave @ airport (Smithson)
- Maracite drill thru (>200ft. of
Seds. into a 1 1/2' dacitic rx (+ P 7)

⑤ MARCASTITE GOSSEN Zn RDN

Photo - look W up valley along
'Lower Marcastite Gossep' Zn
- domal dacite

- 'feeder' struck black chalcidag
- Pepperite - seafloor interface
(unlith. water-laden seds.)

Photo - 'Pepperite' ('concretions')

Photo - Clastic Sed. zone draped
over pepperite
+ 'black' mar. frag. + fossilifer
log black silica - a la Hank?
(is volc. system breached?)

→ 'CARCAS' VALLEY (Veins)

Photo → looking N. to Main Zone
[Main zone + showing - small drill]
- vein (float) below cliff
faces (Nanda drilled ~15 holes
from "very difficult" set-ups
(good soil geochem at base of cliffs)
- veins hosted by dacites - argillite above
