Hello Tom,

About a year ago we sat in on some meetings together regarding Red Chris. At the time you mentioned an "up-dated" version of the Special Volume 15 on porphyry copper deposits of the Canadian Cordillera.

Well I thought I had ordered it (and kind of forgot about it) but now I realize I must have forgotten to order it because it isn't here. I also seem to have lost all reference to it. If not too much trouble, when you get a moment, would you mind phoning or faxing the name of the volume and where I can order it. I thank you very much for this help.

In the meantime Red-Chris continues to sit idle in large part due to copper prices. Hopefully an up-turn in price (Cu) combined with the positive position of the current government will lead to meaningful work next year.

Thanks Tom.

Sincerely, Dave Mehner
