

RED HILL

886948

Catch
Fam

- chat with Paul Baxter (Teck, Ken/boys)
- filed NW for drilling (6?)
in end - Apr. '01 - on north-west side
of grid (i.e. NW of where BP-Seko drilled in early '80s)
- geochem - anomalous > 100 ppm Cu

→ Kutchko Creek 'equivalent' / style
VMS Target

- host rocks incl. felsic volcs (tuffs?) + mafic
volcs + argillites
- also co-eval (by dating) diorites.
- entire property is owned 100% by Teck
(incl. additional staking last summer!)
- property is ~20km long (NW-SE)!

RED MILL

Nov. 16/98

Tech Corp.

- (Ashcroft Manor South)
- East side of Trans.-Canada Hwy - large gossans)
 - Graeme Evans to drill any day
 - target is deeper than previous ddh
(i.e. holes stopped short of target)
- ddh based on litho geochem!

[Note: West side of Hwy also has potential
* TGS prop. exam in 1992 (Amoco)]
