RED POINT

Oct. 9/97

- Rossland

rain/snow

Mike Gerg - prospect/owner

Hans Schwabbel - Loumic Res.

- [with RB's]

Ernie

- Core stored at (Mayor) Mike R.
in Casino (~10 min. drive from Trail)

- Examine: 97-2 [total 6 holes]

Photos: 97-2: 60-65m

well bedded tuff + (po);

intrusive + vein po + cpy

Photo - intr. + black + po/cpy @ 125m

KEY FACTORS: ① brownish-purple alt'n
in hntfs, tuffs, por. intr. i.e. à la
secondary biotite

② cream alt'n à la albite

③ Po occurs as: i) replacement (of matrix)
frag. (angular) in volc bx; ii) dissem.
in intr. ('replacement' of matrix?); iii) cross-
cutting vein jets (+ cpy); iv) bedded
(replacement) of po in tn. tuffs

④ 1988 ddh + rdh. - Tobex - Egil Livgard

② late stage, carbonate veinlets (minor)

MODEL: Rosslund intrusions (192Ma)
intr. into co-eval pile of ands.
volcs.

→ Need petrographic results
(Leitch) - in progress

- late-stage (unmin. - tr. cube py)
por. dyke [fresh looking]

Drive (~ 1/2 hr) up to Lookout Pt. - 97-4
ppt arsenic 'vein' (up to 1.7 ppt Au)

Photo - overlooking 97-6 (~100ft. from 97-2)

↳ pits just downslope (in bkgd). - 3

→ Needs a detailed grid, plus
geophys. (incl. T.P.)
