

①

REDTON

Sun. Sept. 3/06

(Takla-Rainbow + Kliyul)

Sunny +

- with Bob Lane

- camp in Tuvan Crk Fault (cuts off min)

Host: Larry North Cook: Will

~ 20 people in camp

Geoinformatics Expl'n

- Full Force Drilling (Peachland) - Dan Hill (covers activity)

[5 people @ Ichentla Crk.; 8 in Takla-Rainbow camp]

~ 7 @ Kliyul

min. helicopter flight (amb Silver Crk. camp)

'Nightbank' old '70s zone - south of my expl'n

Mesilinka - new proj. between Lorraine + Kliyul (80-km strike) (as far north to just below Gerle Gully, Mc Connell Crk) (needs to be flown in a detailed mag)

Target: Porphyry (Cu-Au) (Late '05: airborne survey) - Fugro + Aeroquest

2 in-house geophysicists on MOCA targeting - deep mag anomaly

'best' targets - just north of Takla-Rainbow

~ 200m @ .14% Cu (Red Zone) / 2nd (unreported) hole - 900m

887080

(2) NE 'Comida' + TTK target
+ Duckling target (see map) results
Red Zone: gtz veins + cpy in
Ksp + Qtz + H₂O.

200m @ .14% Cu

Incl. 12m @ .4% Cu, 0.5 g/t Au

(from pads below old ^{drill} road around
& over pass from camp)

TTK Zone - drilled 3 holes, Cu, Ag, Mo
- no joy. - only epidote + alb

Rainbow Target - 1 km E of Red Zone to drill
(just above camp) - epidote + ksp + alb

Steve Bowen - 'Chief' geologist
~~at 21921 + 21922 + 21923~~ projects (ex-Kemecoff held)
(Rob Hamill - ^{son of} ind. proprietor holds ground)

Kliyul - prev. 25 holes (eg. Noranda)
- on 2nd hole row (if OK - will drill
(mag-cpy target to 100m) 'Main' zone

eg. 2m @ .8% Cu assoc. with gtz. veins

* taking & gathering Commander Res. ^{near Trench}
Abe Hal _{put} targets (next yr?) + Atea prop.

(3)

REDTON

Sun. Sept. 3/06
Sunny + 22°C

- with Bob Lane
- Redton drilling est. 10 holes
- Kluyul " " est. 2-3 holes

Totals ~ 4500 m
(i.e. less than budget 6000 m
- run out of time)

Photo: - Core 06-32 ~ 114m
glt'd por with Qtz, veinlets (cpx)
with preferred orientation + micro-
faulting (crowded por.)

- very nice looking porphyry but
with more Qtz veining
(i.e. not an alkalic system)

Photo 2nd hole - below above one (not reported)
RZ-06-04 ~ 33m
good cpx in Qtz. veins in crowded
por.
- good intersec.
→ incl. tourmaline + cpx

Photo RZ 06-04 ~ 94m 'patchy' texture
+ cpx / Reminds TGS of Equity Silver

④ Photo RZ-06-04 ~ 110m
tourmaline-bx (+ cpx)

* > 100 m intersection (no results yet)

Photo RZ-06-04 ~ 152-153m
- good cpx + hem min. in 'bx'

Crackle bx. / overprinting

~~★~~ Hole # RZ-06-04 - very interesting!
- some good Cu (cpx) min. + minor py
+ tourmaline in gtz veinlets
in crowded porphyry (phyllitic alt.)
→ calc-alkaline system

Photo Crackle bx (176-185m)

- high-level por. system

KLIVUL CORE #1 in ^{at 10m depth}
cpx in gypsum-rich ^{in veinlets} KL-06-32

#2 - targeted for 500 m depth (i.e. new info)

- walk to Red Zone - Photo - look W over RZ-06-04
Photo: Tourmaline bx, plus crowded por + mel
- main surface showing

End (W) of drill rd. - old adit + 06-01 (below) on talus slope ~ 150m
@ 15% Cu
- microinite host
