Hi, Garry - will send you guys a copy of the 2005 MEG Directory when I return from the PDAC in mid-March. Sorry - on the run.

Tom

Subject: MEG list

Tom,

Brian Grant says you may have a number of extra MEG directories. George Owsiacki and I are active in vending properties we staked and would like to have a copy each if possible. If you have them you can send them both to me. My address is:

Garry Payie
 3714 Raymond Street South
 Victoria, BC
 V8Z 4K1

Speaking of properties we have 4 Mo properties that we are now prepared to offer including Serb Creek, Pitman, LLC and Salal.. If you are aware of any companies that are considering properties offered for option please let me know.

We also have two carbonatite properties that aren't in the MINFILE database along with a nepheline syenite (Trident) and one epithermal gold (Sabre).

The Sabre is 20 or 30 km east of the Clisbako property. In 1989, we found over 1 gm of gold in two samples over a kilometer apart in basalt rocks. Ootsa rhyolite rocks occur adjacent but are largely covered by unconsolidated sediment. I think it is fairly interesting but I didn't tie up enough of the pertinent ground and will be meeting with Duncan McIvor (who staked around me) to work out a deal of mutual interest.

Thanks Tom,
