

MEMORANDUM

Samatsum May 7/92
887343

Tom. Here is the Samatsum Mine Closure Plan which will be discussed by Minnova staff at the May 28th Meeting. There is ^{also} a very thick Vol. 2 that accompanies this which is full of reclamation / water quality - type tables, graphs & charts etc. that I have not included.

This, at least, will give you an idea of their situation. Please bring it with you to the meeting & leave it with Ed Sadar or whomever so that it makes its way back here.

We should, at least, get copies of geological plans, sections & possibly assay plans & sections, if available, plus any geological interpretation info.

Hope you enjoy the meeting
& thanks for filling in for me.

Rich.
