

SAULT

Sault 103P/14W  
887366 103P245

Oct. 13/88

(KIT) - chat with Jerry Blackwell

- Cominco prop. SSW of Kitsault Lake
- classic volcanogenic massive sulphide target (esp. Zn)

- "may contain world's largest reserve of celestite"  
 (~~gypsum - CaSO<sub>4</sub>~~)  
 (SrSO<sub>4</sub>)

- also ab. very fr. gr barite  
 + Green (CdSO<sub>4</sub>?) → greenokite  
 + arsenopy

- Drilling = good - able to correlate stratigraphy between holes (fairly deep)

Host rx. = ? (Hazelton pyroclastics) near contact with Bowser Op. seds.

→ Best AR by Blackwell ~ 1986

⇒ VGS to follow up!
