Schaft Creek

Dear Mr. Schroeter

On the occasion of a geological seminar dealing with ore deposits at the University of Heidelberg I have been requested to present a project about the Schaft Creek deposit BC/ Canada.

Therefore I was in contact with Mr. Hagen, who gave me your address. Now I hope that You can help me or give my letter to other institutions.

The only reference I found came from the book entitled:  
MINERAL DEPOSIT MODELS, U.S. GEOLOGICAL SURVEY BULLETIN 1693  
UNITED STATES GOVERNMENT PRINTING OFFICE, Washington 1986

There I read that the Schaft Creek I'm interested in is a porphyry copper deposit. As far as I know copper and molybdenum are mined there.

I thus presume, that the informations I need refer to the area (2) mentioned in the letter enclosed.

My special interestes are:

- The geological position and the extent of the deposit
- The reservs
- The way of preperation of the raw material
- The output i.e. g ore per t dead rock and t ore per year
- The infra- structure
- The outlet and, if possible, additional details about the turnover of the mining company as well as sketches and photos of the exploitation and the preperation of the raw material
- I would actually be interested in any kind of information available concerning the deposit
- Furthermore I- d like to know about comparative figures of other mining- companies exploiting copper and molybdenum, in order to get an impression of the importance of the Schaft Creek deposit for the international market

Naturally I am prepared to reimburse you for the expenses you might have.

In anticipation I thank you for your helpfulness.

Yours sincerely M. Hoffeins

RE: Mining Companies in Shaft Creek BC

Could you please give us more information as to exactly what your client needs to know. We are unable to get much specific information as Shaft Creek represents many different things.

(1) Shaft Creek is a property owned by Tech Corp. Apparently they have not done anything on their property in the past year.

Contact: Tech Corp.  
8th Floor  
1199 West Hastings St.  
Vancouver, B.C.  
V6E 2K1  
Tel: (604) 687-1117  
Fax: (604) 6100

(2) There is an area known as Shaft Creek and approximately 40 million has been invested there in exploration and mining. No list was available, but you may contact the Ministry or the Chamber of Mines directly at:

Tom Schroeter  
Ministry of Energy, Mines  
And Petroleum Resources  
Suite 159  
800 Hornby St.  
Vancouver, B.C.  
V6Z 2C5  
Tel: (604) 660-2708

BC & Yukon Chamber of Mines  
840 West Hastings  
Vancouver, B.C.  
V6C 1C8  
Tel: 681-5328

(3) Also in the Shaft Creek area is the Eskey Creek, where the largest gold source in Canada has been uncovered and has generated a great deal of interest. Tom Schroeter may be contacted for more information in this area.

A small report has been prepared by Dave L'Elfebure called " Mines in the Making in Northwestern BC" and we will send you a copy in the pouch as soon as it becomes available.

Please let us know exactly where your client's interests lay, and what he wants to know about the area. We will then be able to give you a specific response. Background information on your client would be helpful in knowing what to research for him.
