Subject: LEAN-TO PROPERTY - CAMP MESS

Dear Brian,

It has been brought to my attention by a contractor who has just completed a week's program on the Lean-To property for a client (Hi-Tech Management) that a potential environmental hazard exists. For obvious reasons, this contractor would like to remain anonymous, however, he is willing to "come forward", if required. He is concerned about the condition of the 'previous' camp (i.e. pre-1990), particularly the presence of fuel drums (not empty). My records indicate that the past/present(?) owners are Landsdowne Minerals Ltd.

For the sake of the 'mining industry'. I believe this situation needs attention. If I can be of any further assistance, please don't hesitate to contact me.

Yours truly,

Tom Schroeter, P.Eng.
Senior Regional Geologist
