

SILVER BUTTE

887514

July 2/85

- chat with Paul McGuigan
- now optioned Kansas cl. along strike (to south) that adds another 1500m or so (lady from Edmonton waited 4 yrs.)
- Drilling has outlined ~ 100,000 tons @ 80¢/lb Au grade.
- Northair to drive an adit into zone & set up drill stations u/c.

SILVER BUTTE

35 Zone - 'main' zone

- Visage

Tenajon Res.

180 m strike

North-trending zones

- new zones - Kansas, West Kansas - en echelon to 35 zone

- Qtz-ksp ar alb envelopes are zone

of very little base metal - very siliceous - minor py (~1%)
(very crse. gold) -> assoc with Fe-rich ZnS

West Kansas - incl. stringer zone - ZnS with Au in
Qtz. veinlets

- min. cut off at depth by Anomaly Ct. Fault (H. lateral reverse)
- problem with continuity

up to 1.5 km displacement

Anomaly (Ct.) Zone - silica eq. 2.5 g/t Au over 10 ft,

BM Zone - en echelon to other zones

eq. .45 over 3 ft, - needs much more work!
