

UNIVERSAL TRANSVERSE MERCATOR PROJECTION
 NORTH AMERICAN DATUM NAD 83
 UTM ZONE 11

NOTE: BASE FROM 1:20000 TRIM MAP 82F043, 1991
 and 1:50000 NTS 82F/6 (NELSON) EDITION 5, 2000.

LEGEND

- A-Sist (hfls)** Argillite
Dark grey to black, generally massive with narrow interbeds of medium grey-green siltstone and/or dacitic tuff. Hornfelsed equivalent is hard, massive dark purple with sugary texture.
- Ft (hfls)** Felsic Tuff
White to pale grey, fine-grained with local cm-size lapilli. Occasional quartz eyes and quartz eye fragments. Hornfelsed equivalent is hard, massive pale purplish with sugary texture.
- LS** Limestone
Pale greenish grey, fine grained to massive.
- Hbd Por** Hornblende Porphyry
Hornblende-biotite porphyry, long tabular hornblende phenocrysts; hexagonal, flaky biotite.
- Gb** Gabbro
Dark green medium to coarse-grained, biotite-rich.
- QM (PP)** Quartz Monzonite to Quartz Diorite
Equigranular to plagioclase porphyritic, generally green, 10-20% quartz, 10% biotite and augite (?).
- Sy** Syenite
Pink, coarse grained K-feldspar porphyry, locally phenocrysts >1cm.

- sph Sphalerite
- po Pyrrhotite
- py Pyrite
- cp Chalcocopyrite
