ATTENTION: Mr. Tom Schroeter  
District Geologist

Dear Tom:

RE: SUMMARY OF MINERAL & COAL EXPLORATION IN  
NORTH WESTERN B.C., 1984

Thank you for your letter of October 1st with regard to the above summary.

We have once again been very active in 1984 at Midway. The major physical work involves drilling; 35,735 feet in 49 holes. We, therefore, have now completed 94,380 feet in 102 holes since 1981 and are now preparing to go underground this fall.

Best regards.

Yours very truly,

CORDILLERAN ENGINEERING

John W. Stollery, P.Eng.
